Image Sources for Post Feed Slides (Pro)

Slideshow: Post Feed Slides · https://www.metaslider.com/docs/image-sources-for-post-feed-slides/

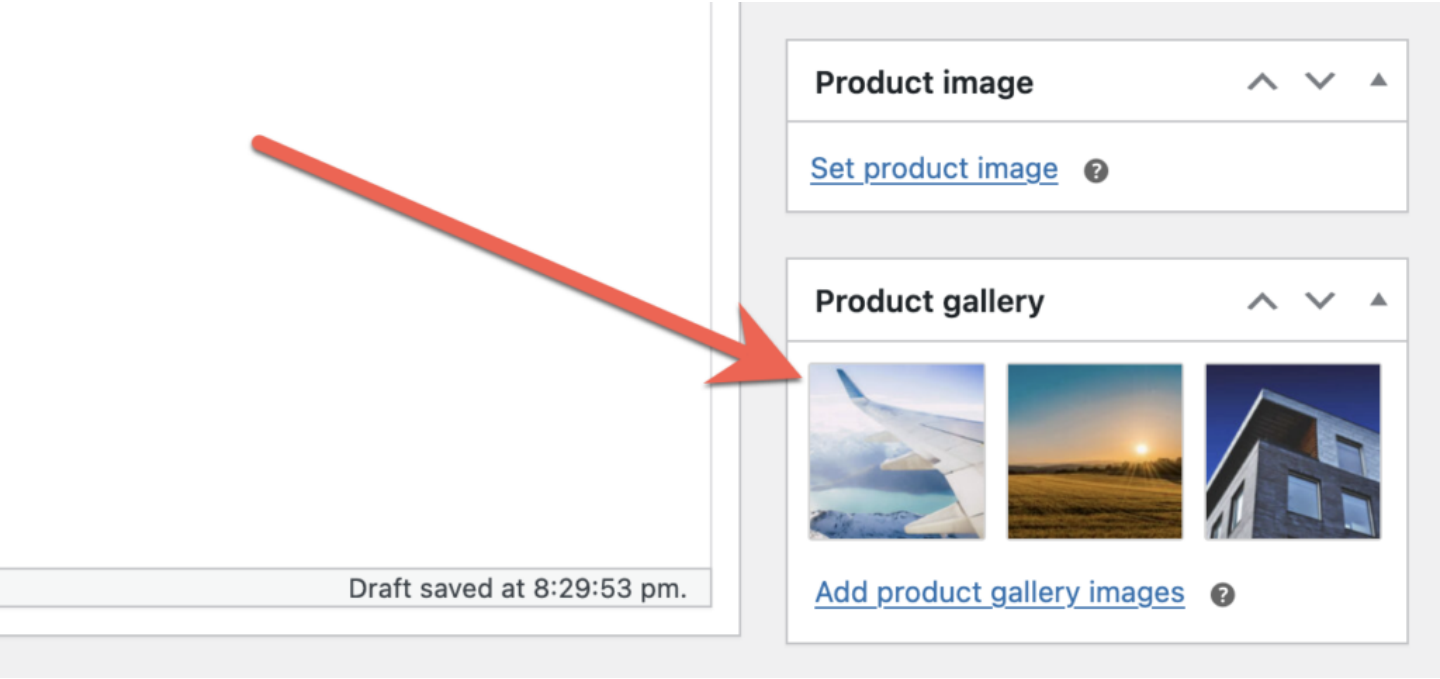
This feature requires the MetaSlider Slideshow Pro plugin.

The Post Feed slides feature in MetaSlider Pro will automatically use the "Featured Image" for each post.

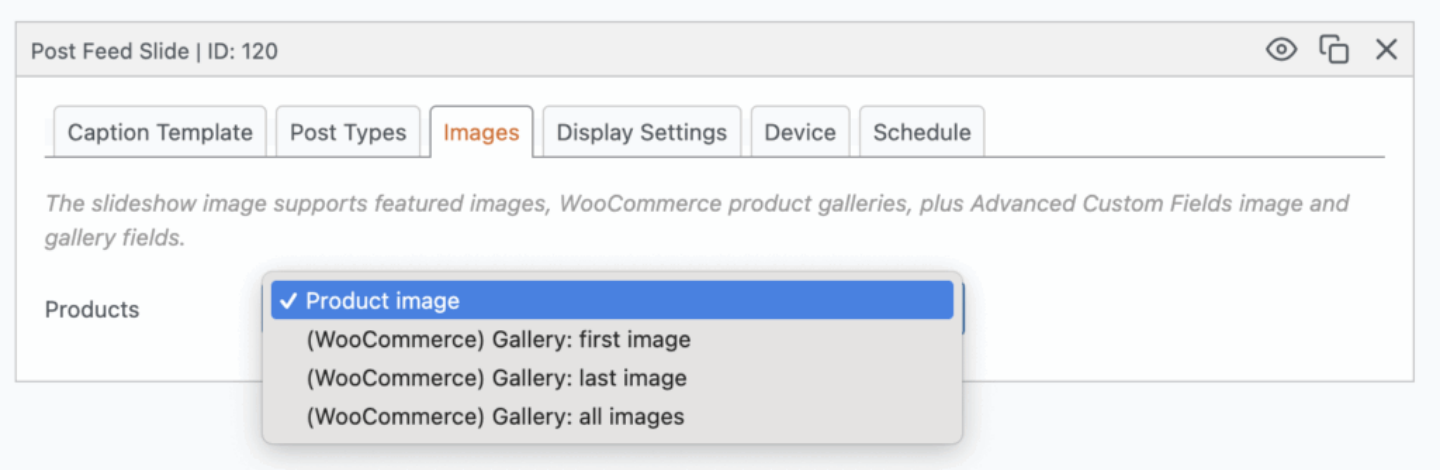
However, other options are available. It is possible to automatically pull in slideshow images from more sources if you're using WooCommerce or the Advanced Custom Fields plugin.

Post Feed Slides and WooCommerce

By default, MetaSlider slides will look for the "Product Image" field in WooCommerce and will display that image. However, it is also possible to use the "Product Gallery" field, as shown in this screenshot.



When you're using WooCommerce and have created a Post Feed slide, look under the "Images" tab. You can choose to pull media from the WooCommerce gallery for each product.



Post Feed Slides and Advanced Custom Fields

By default, MetaSlider will always look for the "Featured Image" field on any posts using Advanced Custom Fields.

However, when you're using a Post Feed slide and Advanced Custom Fields, look under the "Images" tab and you can choose to pull media from an ACF Gallery field for each post.
