MetaSlider Slideshow Free Changelog

The Free version of the MetaSlider Slideshow plugin is available on WordPress.org. The changelog for the Free plugin is below:

The format is based on Keep a Changelog

and this project adheres to Semantic Versioning.

[3.114.0] - 27 October, 2026

- ADDED: Ad for the MetaSlider Downloads plugin, which counts and protects file downloads, #2561;
- FIXED: Form fields in the slideshow editor, the slideshow settings and the slideshows list now have labels for screen readers, #2513;
- FIXED: Headings on the Quick Start page, the upgrade page and the "View Usage" window now follow the right order for screen readers, #2514;
- FIXED: Images in the slideshows list, the slideshow editor and slideshows without alt text now have an alt attribute for screen readers, #2512;
- FIXED: Slideshows could fail to start, with the error "flexslider is not a function", when the site's theme loaded its own copy of jQuery, #2521, #2531;
- FIXED: Cache file saved inside the plugin folder, making plugin checksum checks fail, #2524;
- FIXED: A failed email sign-up still counted as signed up, so the sign-up popup never showed again, #2529;
- FIXED: "Try again" in the email sign-up popup failed right away for a minute after a failed sign-up, #2536;
- FIXED: Saving a setting on the Settings page could undo an email sign-up, #2541;
- FIXED: The MetaSlider logo was out of place on the Quick Start page, #2486;
- FIXED: Sites using an older version of MetaSlider Slideshow Pro stopped working after updating, #2480;

- FIXED: PHP warnings "Undefined array key width" and "height" on slideshows with Lazy Load on and a Livid slide, #2562;
- FIXED: With Lazy Load on and Smart Crop off, other images on the page could be replaced by the slideshow's placeholder, and slide images could stay hidden or lose their responsive sizes, #2490;
- FIXED: "Hide slide" wasn't saved for Local Video slides unless MetaSlider Slideshow Pro was active, #2581;
- FIXED: PHP warning "Undefined array key smartCrop" for slideshows saved without a Smart Crop setting, #2526, #2471;
- FIXED: Error "imgSrc is undefined" on looping slideshows with Lazy Load on, when the first or last slide has no image, #2568;
- FIXED: Previewing a custom theme from MetaSlider Slideshow Pro before selecting it showed the theme without its custom colors and settings, #2572;
- FIXED: Adding an Image, Livid or Local video slide could create it in a post that isn't a slideshow, #2579;
- FIXED: Changing, duplicating, deleting or restoring a slide could change a post that isn't a slide, or a slide in a slideshow the user can't edit, #2582;
- FIXED: Saving a slideshow could change posts that aren't its slides, trashing, restoring or deleting from the slideshows list could change posts that aren't slideshows, and a slideshow setting could add unsafe code to the settings screen, #2591;
- FIXED: Image Crop Size 1x was saved as "true", so every save re-cropped every slide, #2597;
- CHANGED: Confetti on the Quick Start welcome message, like in MetaSlider Downloads, #2566;
- CHANGED: Email sign-up offered once more to existing users who have not signed up yet, #2519;
- CHANGED: MetaSlider now requires WordPress 5.9 or newer, #2500;
- CHANGED: Redirects to MetaSlider admin pages now use the WordPress safe redirect function, #2501;
- CHANGED: Admin page text is now escaped before display, and plugin files can no longer be opened directly, #2499;
- CHANGED: Smaller, minified script and style files are now loaded by default, so pages load a little faster, #2544;
- CHANGED: The slideshow editor opens faster for slideshows with many slides, #2313;
- CHANGED: New helper for checking whether a post is a slide, shared with MetaSlider Slideshow Pro, #2577;
- CHANGED: New helpers that stop an AJAX request unless it is for a slideshow or a slide the user can edit, shared with MetaSlider Slideshow Pro, #2578, #2582;
- CHANGED: Ran a routine Composer dependency update for the development tools, #2586;
- CHANGED: Updated the Axios npm package, #2585;

[3.113.1] - 30 September, 2026

- FIXED: Captions could show HTML as plain text, or the site could stop loading, when another plugin used their own copy of HTML Purifier library, #1744;
- FIXED: Slideshows with Lazy Load turned on could stop the whole page loading on PHP 8 when the slideshow had no width or height set, #2488;

[3.113.0] - 17 September, 2026

- ADDED: Local Video slides are now part of the free plugin, #2346;
- ADDED: Add a slide by pasting the link to a video hosted on livid.com, #2345, #2405, #2448, #2451, #2452, #2469;
- ADDED: Livid video demo to quick start, #2446;
- FIXED: Slideshow could show up blank on mobile and Safari when added with Elementor, #2347;
- FIXED: The Import page kept showing "Click the Import button to begin" while an import was already running, gave no import progress, and still listed slideshows as ready to import after the import finished, #2394;
- FIXED: Carousel-mode slideshows could lose their carousel settings and fall back to a plain fade when mobile slide settings or per-device slide counts were used, #2337;
- FIXED: Slideshow preview was broken when a different number of slides was set for mobile, tablet and desktop, #2380;
- FIXED: Admin preview showed the slideshow at 1px wide when the slideshow had no saved width setting, #2412;
- FIXED: Carousel mode could need an extra arrow click to reach the last slide, and the same going back, #2424;
- FIXED: The Loop setting was hidden when Carousel Mode was enabled, even though it still worked, #2419;
- FIXED: A slideshow added to a sidebar or widget area could show up without its styles and slide animation, #2333;
- FIXED: Local Video demos on the Quick Start page were still shown as Pro, even though Local Video slides are now free, #2449;
- FIXED: Local Video and Livid video slides were missing the Schedule and Advanced tabs shown on Image slides, #2465;
- CHANGED: Left development source files (Vue, Sass and bundled library sources) out of the plugin zip, #2407;
- CHANGED: Updated the bundled query string library to a version with security fixes, #2376;
- CHANGED: Updated the bundled TinyMCE editor library, #2401;
- CHANGED: The Add Slide window now opens on Local Video, which is listed before Image, #2460;
- CHANGED: Translation updates, #2462, #2464;

[3.112.0] - 31 August, 2026

- ADDED: A Settings & Help option to control the default Unsplash/Pixabay image and video quality, with safer default sizes so downloads don't exceed what WordPress can actually process, #2365;
- ADDED: Choose how many slides to show on mobile, tablet, and desktop, #2141;
- ADDED: New email sign-up system, and faster Pixabay/Unsplash image search, #2150, #2324, #2340;
- ADDED: More tips throughout the slide editor about MetaSlider Pro features, #2254;
- ADDED: Tooltips for all theme color settings, #2312;
- ADDED: Search and add Pixabay photos directly to your slides, #2318;
- ADDED: Global and per-slide image Styles (filter, corners, border, shadow, opacity, transform), #2241;
- FIXED: "Theme" section is missing the word "Options", #2316;
- FIXED: Background color on the Quickstart screen, #2321;
- FIXED: Slide links opened in the same tab when previewing a slideshow, #2322;
- FIXED: Slideshows not sorting correctly in the "Sort Slideshows By" list, #2326;
- FIXED: Restored the plugin's icon and logo images, #2327;
- FIXED: Some themes (like Draxler) were missing their default caption style in the preview, #2334;
- FIXED: Admin menu icon shrinking on every page except MetaSlider's own, #2341;
- FIXED: Added a missing "Show only in the first loop" upgrade prompt to the Advanced tab, #2342;
- FIXED: Replacing an existing slide's image with a Pixabay/Unsplash photo didn't update the slide thumbnail, #2353;
- FIXED: Adding a new slide from Pixabay/Unsplash reloaded the whole page instead of just adding the slide, #2358;
- FIXED: The page didn't scroll to the newly added slide after adding it via Pixabay or Unsplash, #2363;
- FIXED: An error could prevent selecting a new theme after picking a different theme before the previous selection had finished saving, #2362;
- FIXED: The placeholder logo in the slideshow list wasn't vertically centered, #2361;
- FIXED: Some Advanced Settings weren't shown as Pro upgrade prompts when Pro wasn't active, #2367;
- FIXED: A small spacing bug in the media library popup heading, #2366;
- FIXED: The admin preview broke in Carousel mode when using "Slides to Show per Device", #2343;
- CHANGED: Updated the admin menu icon, #2215;

- CHANGED: Fixed several admin screens (like Image Styles) that weren't being translated at all, #2344;
- CHANGED: Renamed the "Pro Settings" section to "Advanced Settings" in Settings & Help, #2369;
- CHANGED: Updated the plugin icon shown in the block editor, #2357;
- CHANGED: Renamed the Gutenberg block from "MetaSlider" to "Slideshows", #2187;
- CHANGED: Renamed "Advanced Options" to "Layout Features" in the slideshow settings, #2356;
- CHANGED: Slideshow settings now start with only Main Options open, #2355;
- CHANGED: Excluded translation PHP files from the languages folder in the plugin zip, #2351;

[3.111.2] - 05 August, 2026

- FIXED: Slideshow settings allow-list was missing some settings, #2311;
- FIXED: Tooltips for theme customize colors in slideshow edit, #2310;

[3.111.1] - 03 August, 2026

- FIXED: HTMLPurifier class exists check, #2300;
- FIXED: Sanitize slideshow settings and set capabilities for slideshow CPT, #2302;

- FIXED: Fixed easing settings on FlexSlider, #329;
- FIXED: Updated Italian translation, #332;
- FIXED: Updated French translation, #340;

[3.28.2] - 20 December, 2022

- FIXED: Fix conditional loading for lib Appsero, #326;

[3.28.1] - 20 December, 2022

- FIXED: Update Appsero Client library fixing a CSRF issue, #319, #317;
- FIXED: Fix effects that were not working, #310;
- FIXED: Fix compatibility with plugin qTranslate-XT, #294;
- FIXED: Fix thumbnails that were not working in the slideshows list, #98;
- CHANGED: Change modal box making clear we are asking to collecting the email, #153;

[3.28.0] - 01 December, 2022

- FIXED: Fix console errors (Vue.js Errors) when language is switched to "Deutsch (Schweiz, DU), #212";

- FIXED: Embed external Google fonts in the plugin to not make remote calls, #225;
- FIXED: Fix CSS for preview in Gutenberg, #289;
- FIXED: Fix export slideshows feature when having more than 20 slideshows, #271;
- FIXED: Fix links in the readme file, #288;
- FIXED: Fix style and image on Gutenberg block, #255;
- FIXED: Smart pad feature breaks on PHP 8, #272;
- FIXED: Small error with hover text in toolbar, #276;
- CHANGED: Update the Add a slide button, #127;
- CHANGED: Change min PHP version to 5.6;

[3.27.14] - 17 November, 2022

- FIXED: Fix banner that will not dismiss, #285;

[3.27.13] - 26 September, 2022

- FIXED: Fix Unsplash library, #248;
- FIXED: Fix PHP warnings about undefined array keys: "post_excerpt", "new_window", #246;
- FIXED: Fix error on PHP 8: Fatal error: uncaught TypeError: floor(): Argument 1 must be of type int|float, #247;
- FIXED: Advanced settings processing, fixing the field Open in lightbox added by the lightbox plugin, #251;
- CHANGED: Updated IT and FR translations (Thanks to @wocmultimedia), #245;

[3.27.12] - 08 September, 2022

- FIXED: Fix the option "Open in a new window" on the slide editor page, #238;
- FIXED: Fix the "Caption" field accepting HTML code, #242;
- FIXED: Fix slide saving that was stripping settings when Pro was activated, #239, #240;

[3.27.11] - 07 September, 2022

- FIXED: Fix the Caption field when editing a slideshow, #234;
- FIXED: Fix the SEO fields when editing a slideshow, #235;

[3.27.10] - 07 September, 2022

- FIXED: Fix select fields in the slideshow metabox, #231;

[3.27.9] - 06 September, 2022

- CHANGED: Updated Axios JS library to v0.21.2;
- SECURITY: Fix image alt attribute sanitization and escaping on the gallery, #207;

- SECURITY: Fix gallery settings input sanitization, #207;
- SECURITY: Added additional permissions check before saving data in the admin;
- FIXED: Removed not used demo folders and index.html files from JS libraries, #213;
- FIXED: Fixed the redirection URL after deleting a gallery, #221;

[3.27.8] - 18 July, 2022

- CHANGED: Set Extendify SDK as disabled by default to fix support to WP 4.9, #197;
- FIXED: Fix WP 4.9 support checking if function 'wp_set_script_translations' exists before calling it, #196;

[3.27.7] - 14 July, 2022

- FIXED: Fix Italian language translation, #137;
- FIXED: Fix issue with Docket Cache, #182;
- FIXED: Fix translation of pages based on JS, #186;
- FIXED: Fix language translation for the MetaGallery module, #138;
- FIXED: Remove not needed use statement for the class Extendify\Library\App, #136;

[3.27.6] - 27 June, 2022

- CHANGED: Improved the promo banner, #141, #168, #166;
- FIXED: Error "Cannot read properties of undefined" and "t.value is undefined" in the Export area, #142, #163;
- FIXED: Thumbnails are not showing in the slideshow list, #98;
- FIXED: Stop showing generic JS errors using toast messages, #162;
- FIXED: Error PHP Warning: Illegal string offset 'dismiss_time' in on line 204, #174;
- FIXED: Stop showing promo banners if Pro is installed, #170;

[3.27.5] - 12 May, 2022

- FIXED: Fix conflict with MetaSlider Lightbox after the latest update, Class 'Extendify\Library\App' not found, #132.

[3.27.4] - 11 May, 2022

- ADDED: Complete logo in toolbar.
- ADDED: Add setting field to disable Extendify internal integration, #106.
- ADDED: Add Italian translation files to the languages folder, #112.
- CHANGED: Updated the Spanish translation files on the languages folder, #112.
- CHANGED: Add a delay of a few days before displaying the Extendify banner, #105.
- CHANGED: Updated the Extendify SDK to version 0.8.1, #120.

- REMOVED: Plugin version below logo from toolbar, #115.
- REMOVED: Short logo from toolbar, #115.
- REMOVED: Gutenberg box from welcome screen, #116.
- FIXED: Banners discount, #107.
- FIXED: Fix the privacy policy link in the settings page, #121.

[3.27.3] - 21 March, 2022

- CHANGED: Update Extendify library.

[3.27.2] - 08 March, 2022

- CHANGED: Update Extendify library.
- REMOVED: Remove get_plugins early cache.

[3.27.1] - 22 February, 2022

- ADDED: Added animation back to slide previews, but only on hover.
- ADDED: Added rel and alt tags o nivo slider.
- REMOVED: Removed slide data from local storage when the user has high slide count.
- FIXED: Fixed version number display bug.
- FIXED:Fixed bug where high post ids took time to save - thanks @fschatz.

[3.26.0] - 08 February, 2022

- CHANGED: Update Extendify library.

[3.25.2] - 01 February, 2022

- FIXED: Removes WP welcome notice interference.

[3.25.1] - 26 January, 2022

- FIXED: Adds compatibility with WP 5.9 and block prop filter.

[3.25.0] - 25 January, 2022

- CHANGED: Update Extendify library.
- FIXED: Adds PHP5.3 compatibility by removing array shorthand syntax.

[3.24.0] - 06 January, 2022

- CHANGED: Update Extendify library.

[3.23.5] - 30 November, 2021

- FIXED: Fixes post output stripslashes bug.

[3.23.4] - 23 November, 2021

- FIXED: Fixes array key on boolean bug.

[3.23.3] - 12 November, 2021

- FIXED: Fixes theme conflict with the utility class stylesheet.

[3.23.2] - 11 November, 2021

- FIXED: Lowers utility class display specificity.

[3.23.1] - 03 November, 2021

- CHANGED: Changes how metagallery language files are loaded.
- CHANGED: Updates library.

[3.23.0] - 27 August, 2021

- CHANGED: Bug fixes and updates to the library.

[3.22.1] - 11 August, 2021

- FIXED: Addresses bug with array_key_exists.
- FIXED: Addresses conflict with standalone Gutenberg plugin.

[3.22.0] - 05 August, 2021

- CHANGED: Removes plugin dependency from editor library.

[3.21.0] - 19 July, 2021

- FIXED: Fixes incorrect support URL link.
- CHANGED: Adds MetaSLider patterns to editor Library.

[3.20.3] - 02 March, 2021

- FIXED: Update responsive slides to improve jQuery compatability.
- FIXED: Updates uasort to be PHP8 compatible.
- FIXED: Fixes a typo in the export callback.

[3.20.2] - 08 February, 2021

- CHANGED: Removes unused Alpine helpers to reduce file size.
- FIXED: Removes various PHP notices.

[3.20.1] - 03 February, 2021

- FIXED: Fixes a bug for users on older PHP versions.

[3.20.0] - 18 January, 2021

- CHANGED: Adds the gallery feature.
- FIXED: Fixes typo in API fallback fetch function.

[3.19.1] - 01 December, 2020

- CHANGED: Adds option to filter HTML Purify.
- CHANGED: Updates Appsero dependency version.

[3.19.0] - 12 November, 2020

- CHANGED: Fixes typo on svg button in Simply Dark.
- CHANGED: Adds install date to optin Appsero report.
- CHANGED: Adds passive listener option to FlexSlider touch events.
- FIXED: Processes library assets to minify and optimize (production ready).

[3.18.9] - 05 November, 2020

- FIXED: Adds polyfill for WP 4.5 wp_add_inline_script.
- FIXED: Removes some non PHP 5.3 code from 3rd party lib.

[3.18.8] - 02 November, 2020

- CHANGED: Pass callback function to Appsero instead of relying on caching..
- CHANGED: Switches Appsero integration to only collected info on the user that logged in..
- FIXED: Adds PHP5.3 compatibility by removing array shorthand syntax.

[3.18.7] - 27 October, 2020

- CHANGED: Clean up some of the Analytic specific items and reporting bugs. Note: no bugs related to improper handling..

[3.18.6] - 26 October, 2020

- FIXED: Remove PHP 7.3 specific trailing commas.

[3.18.5] - 22 October, 2020

- CHANGED: Moves the support related items to a separate page in prep to make it more robust..
- CHANGED: Updates privacy policy and opt-in product analytics.

[3.18.3]/4 - 15 October, 2020

- CHANGED: Updates plugin name to better describe its use, but keep plugin page title simple.

[3.18.2] - 02 October, 2020

- FIXED: Scopes slideshow cache to site (for multi-site support).

[3.18.1] - 21 September, 2020

- FIXED: Removes Nivo loading gif and add back specificity.

[3.18.0] - 05 September, 2020

- FIXED: Updates UI elements and updates icon set (FA was causing issues on some hosts).

[3.17.6] - 31 August, 2020

- FIXED: Fixes issue with build script and script version number.

[3.17.5] - 31 August, 2020

- FIXED: Fixes bug where the notices nonce script loading relied on jQuery.

[3.17.4] - 29 August, 2020

- CHANGED: Tweaks to the deploy script (patch version numbers might jump as a result).
- FIXED: Adds extra check for HTML Purify class (fixes conflict with CiviCRM).

[3.17.2] - 28 August, 2020

- CHANGED: Archives the "Thank you" dashboard notice for now.
- CHANGED: Limits loading admin specific code from the front end.
- CHANGED: Switches to a new CI and build process (report any issues to our support channel).
- CHANGED: Adds extra permission_callback check to settings routes.
- SECURITY: Adds extra filtering of captions using HTML Purifier (http://htmlpurifier.org/). Reminder: Only users with edit_others_posts capability can edit slideshows, which is a role that may be added by third party plugins (ex. Shop Managers from WooCommerce have this role). If you need to limit who can edit your slideshows, then you can update this with the filter metaslider_capability, for example to manage_options. Contact us in support for more information. (Thanks to Fortinet Fortiguard Labs).

[3.17.1] - 13 August, 2020

- CHANGED: Adds permission_callback check to register_rest_route as an added redundancy.
- CHANGED: Updates colorbox's jQuery .live() function to use .on().

[3.17.0] - 05 August, 2020

- CHANGED: Adds setting page to update some default settings.
- CHANGED: Adds export and import functionality.
- CHANGED: Updates jQuery to work with WP 5.5 (while maintaining backwards compatibility).
- FIXED: Fixes a bug where FlexSlider carousel doesn't calculate margins properly.

- FIXED: Fixes a bug where custom themes would show on fresh slideshows.

[3.16.4] - 16 April, 2020

- FIXED: Addresses a conflict with Gutenberg modules that some users are seeing (fix in 3.16.3 was incomplete).

[3.16.2] - 08 April, 2020

- FIXED: Updates Gutenberg module to use the new @wordpress/block-editor library.

[3.16.1] - 03 April, 2020

- CHANGED: Updates the media_buttons_context hook to use media_buttons.

[3.16.0] - 25 March, 2020

- CHANGED: Adds sorting options to the dropdown drawer module.
- CHANGED: Expand error handler attempt to catch errors from elsewhere.
- CHANGED: Expand search results from 15 to 25 and make that customizable.
- CHANGED: Adds a reactive title module.
- CHANGED: Updates to use WP style notifications and modals.
- CHANGED: Loads in recent slideshows and lets the user opt to load more.
- CHANGED: Switches anitmation to requestAnimationFrame for added performance.
- CHANGED: Separates settings saving logic from slides, and saves in chunks of 10 slides.
- CHANGED: Adds warning message to users that have a very low input var setting.
- CHANGED: Adds fallback for 404 routes to admin-ajax.
- CHANGED: Adds ability to use the JS dev build for debugging. Use SCRIPT_DEBUG to enable.
- FIXED: Fixes issue where single quotes in settings input fields would cause a blank page.
- FIXED: Removes unwanted side menu items on the media library view.

[3.15.3] - 28 November, 2019

- FIXED: Updates layout breaks in WP5.3.

[3.15.2] - 14 November, 2019

- CHANGED: Adds loaded event that other plugins can wait for.
- CHANGED: Updates a few UI elements on the search bar and slideshow drawer.
- CHANGED: Adds better checks for error messages.
- FIXED: Fixes an issue where certain settings would show when not needed.
- FIXED: Fixes a layout break in IE11.
- FIXED: Addresses performance issues with a very large collection of slideshows.

[3.15.1] - 22 October, 2019

- FIXED: Adds better check for slide image thumbnails and count.
- FIXED: Updates $ to jQuery on the admin settings screen.

[3.15.0] - 21 October, 2019

- CHANGED: Adds a new way to navigate slideshows.
- CHANGED: Adds various accessibility enhancements to FlexSlider.
- CHANGED: Adds extra checks for REST enabled sites.
- CHANGED: Updates notices.
- FIXED: Updates various RTL language styling issues.
- FIXED: Fixes bug where new slides wouldn't crop until pressing save.
- FIXED: Fixes various layout breaks from other languages.

[3.14.0] - 26 July, 2019

- CHANGED: Adds ability to duplicate a slideshow.
- CHANGED: Adds toolbar with various utilities.
- CHANGED: Adds unified notification system.
- CHANGED: Moves inline styles out of the body tag.
- CHANGED: Refactors the preview module to be called from anywhere.
- CHANGED: Refactors the way slides and the slideshow saving works.
- CHANGED: Refactors the shortcode copy module.
- CHANGED: Adds helper functions to better manage the routes files.
- FIXED: Fixes a bug where adding a class name via Gutenberg crashes the block.

[3.13.1] - 11 May, 2019

- CHANGED: Corrects a check on a variable in Theme.php, preventing a possible PHP notice.

[3.13.0] - 07 May, 2019

- CHANGED: Allows captions to inherit the image description.
- CHANGED: Adds support for theme developers to register a theme.
- CHANGED: Adds extra checks for when a theme is missing.
- CHANGED: Removes some ancient code for compatibility with PHP < 5.1.
- CHANGED: Stops random theme being inherited when user removes it.
- CHANGED: DOM appended slides are now rendered as Vue components.

[3.12.1] - 18 March, 2019

- FIXED: Fixes a bug where Nivo and Coin Slider did not ship with the plugin.

[3.12.0] - 18 March, 2019

- CHANGED: Sets a default theme on a newly created slideshow.
- CHANGED: Adds various trivial code quality fixes.
- CHANGED: Adds access to the Unsplash.com image library.

[3.11.1] - 30 January, 2019

- FIXED: Update Gutenberg compatibility.

[3.11.0] - 30 January, 2019

- CHANGED: Adds drag and drop module.
- CHANGED: Adds a convenient start page for new users.
- CHANGED: Updates various UI elements.
- CHANGED: Removes fonts to reduce package size.
- CHANGED: Adds an escape output of slideshow titles.
- CHANGED: Removes defunct preview method.
- FIXED: Fixes layout issue with notices served by other plugins.
- FIXED: Updates Gutenberg container styles.
- FIXED: Fixes issue where Coin Slider wouldn't open in a new window.
- FIXED: Updates support for Elementor page builder.

[3.10.3] - 04 December, 2018

- FIXED: Updates Gutenberg compatibility.

[3.10.2] - 21 November, 2018

- FIXED: Fixes bug in with captions in NivoSlider.

[3.10.1] - 20 November, 2018

- CHANGED: Removes redundant height and width attributes.
- FIXED: Fixes bug in PHP 5.2 where images would not import.
- FIXED: Updates various translation errors and adds translator tips.
- FIXED: Allows the folder name to be safely changed.
- FIXED: Fixes the situation where using a different folder name breaks everything.
- FIXED: Fixes a Gutenberg-related bug that appears in WP5.0 beta2.

[3.10.0] - 25 October, 2018

- CHANGED: Adds 11 new themes users can apply to their slideshows.
- CHANGED: Adds ability to preview a slideshow with a theme.

- CHANGED: Adds ability for a theme developer to add instructions.
- CHANGED: Adds unique images by theme if a user is importing images.
- CHANGED: Adds new channel for user feedback.
- CHANGED: Adds new developer filters to adjust slide output/visibility.
- CHANGED: Adds a title to the theme module.
- CHANGED: Adds ability to import images with captions, title, alt and desc. from a theme.
- FIXED: Updates unusable filter when attempting to filter slides by type.
- FIXED: Fixes a bug when babel-polyfil is loaded more than once.
- FIXED: Adds an extra check for an error before saving the theme.

[3.9.1] - 28 September, 2018

- FIXED: Fixes a bug where some slides get appended inside others.

[3.9.0] - 11 September, 2018

- CHANGED: Adds the option to toggle autoplay for Coin Slider.
- CHANGED: Adds keyboard shortcuts to preview.
- CHANGED: Adds full width toggle to preview.
- CHANGED: Adds a light and dark preview option.
- CHANGED: Adds ability to import images if none exist.
- CHANGED: Adds Gutenberg block.
- CHANGED: Adds ability to use the title in a shortcode.
- CHANGED: Adds translation functionality to JS components.
- CHANGED: Updates Pro slide types descriptions.
- CHANGED: Adds placeholder and comparison table entries for schedule functionality.
- CHANGED: Adds compatibility with Pro feature ability to change layer slide background.
- CHANGED: Updates option name on slideshow select box as title name changes.
- CHANGED: Adds default Flexslider fonts to repo for users that require them.
- CHANGED: Adds filters to slides edit buttons.
- CHANGED: Tweaks edits buttons style.
- FIXED: Limits image srcset to image and layer slides (fixes post feed image).
- FIXED: Fixes broken Nivo themes (due to css specificity).
- FIXED: Fixes bug where icons would jump during delete.

[3.8.1] - 07 June, 2018

- FIXED: Limits responsive image srcset to slideshows with cropping disabled only.
- FIXED: Increases responsive image srcset maximum size to Full.

[3.8.0] - 04 June, 2018

- CHANGED: Adds compatibility with new Pro schedule feature.
- CHANGED: Adds compatibility with retina plugin https://wordpress.org/plugins/wp-retina-2x/.
- CHANGED: Adds option to enable or disable initial fade in.
- CHANGED: Improves Responsiveness.
- CHANGED: Adds default Flexslider fonts to repo for users that require them..
- CHANGED: Removes plugin dependency on Notice class.
- CHANGED: Standardizes the code to deny direct access.
- CHANGED: Updates how the plugin handles setting updates.
- FIXED: Fixes error when trying to save many slides.
- FIXED: Fixes broken markup in settings in some languages.
- FIXED: Fixes bug that always strips referral tags.
- FIXED: Adds a check to the copy/paste element to make sure it exists before adding an event.

[3.7.2] - 20 March, 2018

- CHANGED: Removes an obsolete admin notice.
- SECURITY: Prevents a non-persistent logged-in XSS attack. The attacker must persuade a logged-in admin-level WP user to click on a malicious link specifically targeted to your site; this can result in his chosen JavaScript being run inside your browser on the MetaSlider page. Hence, the risk is low, but you should certainly update.

[3.7.1] - 13 March, 2018

- FIXED: Updates FlexSlider to remove flash on page load.

[3.7.0] - 26 February, 2018

- CHANGED: Allows users to inherit default captions and other data from the image.
- CHANGED: Updates to the correct support link.
- FIXED: Adds capability filter to pages.

[3.6.8] - 26 January, 2018

- FIXED: Updates support links to their correct locations.
- FIXED: Updates compatibility for various themes (including Genesis).

[3.6.7] - 15 December, 2017

- CHANGED: Adds back in some instructions on how to display the slideshow.
- CHANGED: Removes unnecessary type attribute that was causing validation errors.
- CHANGED: Adds DocBlock checking with CI for PHP and JS files.

- FIXED: Adds compatibility fixes for older WP versions.

[3.6.6] - 23 November, 2017

- FIXED: Fixes FlexSlider bug when resizing slider.
- FIXED: Updates layout on post feed slides.

[3.6.5] - 20 November, 2017

- CHANGED: Prevents a PHP debug log item that appeared in the short-lived 3.6.4.
- FIXED: Fixes issues with bottom margin of slideshow, among other minor tweaks.

[3.6.3] - 16 November, 2017

- FIXED: Updates various styles to retain compatibility with previous releases based upon user feedback.
- FIXED: Removes translation of slider brand names.

UPGRADE NOTE: If upgrading to MetaSlider 3.6+, users of the MetaSlider Add-On pack should also upgrade that plugin to a current release (2.7.1 or later).

[3.6.2] - 15 November, 2017

- FIXED: Update various styles to retain compatibility with previous releases based upon user feedback.
- FIXED: Restore compatibility with old WP versions that lack the wp_add_inline_script() function.

[3.6.1] - 14 November, 2017

- FIXED: Removes default FlexSlider styling.

[3.6.0] - 14 November, 2017

- CHANGED: Allow a slide to be restored after deletion.
- CHANGED: Allow the background image to be changed.
- CHANGED: Adds a guided tour.
- CHANGED: Accessibility enhancements.
- CHANGED: Adds links to activation page.
- CHANGED: Updates FlexSlider to latest.
- CHANGED: Change the label "Meta Slider" to "MetaSlider".
- CHANGED: Add dashboard notices.
- FIXED: Loads inline JS properly.
- FIXED: FlexSlider touch events respect pause on hover setting.

- FIXED: Allow for https image URLs.
- FIXED: Addresses spelling/localization issues.

[3.5.1] - 01 May, 2017

- FIXED: Pre-populate caption and alt text fields for new image slides (based on original media file data).
- FIXED: When a media file is deleted from the media library, also remove it from the slideshow.
- FIXED: Update _wp_attachment_metadata when creating new image sizes.

[3.5.0] - 13 March, 2017

- ADDED: New slides will now be added as a new post type (ml-slide) (existing slideshows and slides will be unaffected).
- ADDED: Add "metaslider_after_resize_image" action.
- FIXED: Don't use WP_Image_Editor to load slide images that are missing metadata (invalid images).
- FIXED: Load admin JavaScript in footer.

[3.4.2] - 16 January, 2017

- FIXED: Don't use WP_Image_Editor to load admin slide thumbnails, use wp_get_attachment_image_src instead. Attempts to fix white screen issues affecting some users. Related: https://core.trac.wordpress.org/ticket/36534.
- FIXED: Load admin JavaScript in footer.

[3.4.0] - 04 January, 2017

- CHANGED: This is the first in a series of small updates which will eventually allow us to remove restrictions in the plugin which prevent us from implementing certain functionality, including:
- Changing a slide image.
- Using unique captions when the same slide has been added to more than one slideshow.
- Adding the same slide to a slideshow multiple times.
- Duplicating slides and sliders.
- Drafting slides.
- Scheduling slides.

UPGRADE NOTE: We are releasing this update in a number of small stages due to the number of users MetaSlider has. We are being overly cautious to ensure it's a smooth transition. This update does not make any major changes to the current plugin functionality, but it does put in place the "scaffolding" code which we will rely on to implement further updates.

[3.3.7] - 06 May, 2016

- FIXED: "Maximum level reached" error when inserting the shortcode for a slideshow into it's own caption. Thanks to Zhouyuan @ Fortinet for reporting this.

[3.3.6] - 14 December, 2015

- FIXED: Save Spinner.

[3.3.5] - 22 September, 2015

- CHANGED: Prepare plugin for WordPress.org translation project (rename textdomain from 'metaslider' to 'ml-slider').
- FIXED: Small styling fix.

[3.3.4].1 - 29 July, 2015

- FIXED: Fix Roots theme CSS conflict.

[3.3.4] - 16 July, 2015

- REMOVED: Remove unused "Resource Manager" code.
- FIXED: Add HTML5 validation by applying a property="stylesheet" attribute to MetaSlider CSS tags.
- FIXED: Chinese language pack updated (thanks to mamsds!).

[3.3.3] - 11 June, 2015

- ADDED: Ukrainian language pack added (thanks to mister_r!).
- ADDED: Add "metaslider_attachment_url" filter.
- FIXED: MetaSlider hoplink incorrectly adding parameters to filtered url.

[3.3.2] - 16 April, 2015

- SECURITY: FPD Security issue. Thanks to Ole Aass (@oleaass) for finding and disclosing this issue.

UPGRADE NOTE: The fix will prevent some servers (configured with 'display_errors' set to 'on') from disclosing the full path to certain files within MetaSlider.

http://codex.wordpress.org/Security_FAQ#Why_are_there_path_disclosures_when_directly_loading_certain_files.3F

[3.3.1] - 23 March, 2015

- CHANGED: Use admin actions to save slideshow settings.
- FIXED: Remove 'create video playlist' option from Media Library (on MetaSlider page only).

- FIXED: Support for Enhanced Media Library plugin.
- FIXED: Return public slide when DOING_AJAX.

[3.3.0] - 17 February, 2015

- ADDED: New feature: Smart pad option (for Image Slides & Flex Slider only).
- ADDED: Portuguese language files added (thanks to mauro.mascarenhas).
- FIXED: Russian language files updated (thanks to asidoryak).

[3.2.1] - 16 December, 2014

- CHANGED: Change slide image functionality backed out.
- FIXED: Apply FireFox mobile fix to Flex Slider (github #1110).

[3.2.0] - 26 November, 2014

- ADDED: Change slide image (click top right of slide thumbnail).
- FIXED: German language files (thanks to Ov3rfly!).

[3.1.1] - 21 October, 2014

- CHANGED: Add metaslider_flex_slider_list_item_attributes filter.
- FIXED: restrict_to shortcode parameter.

[3.1.0] - 14 October, 2014

- ADDED: Ajax delete slide (to stop users from losing changes when deleting a slide).
- ADDED: restrict_to shortcode parameter now accepts page IDs.
- ADDED: Change icon.
- CHANGED: Remove upgrade nags from media library, add Go Pro page (with an option to hide the page).
- FIXED: Minor admin styling fix.
- FIXED: Hide share buttons for pro users.

[3.0.1] - 19 August, 2014

- CHANGED: Allow shortcode parameters to be filtered.
- FIXED: Escape admin setting text fields.
- FIXED: Escape admin tab names (thanks to Dylan Irzi for spotting and reporting this!).

[3.0.0] - 30 July, 2014

UPGRADE NOTE: **This is not a major update. We're just following the WordPress versioning conventions (3.0 comes after 2.9)**.

- ADDED: Set crop position for slides (requires WP 3.9+).

- ADDED: Disable cropping setting.
- CHANGED: Add filter for capability required to use MetaSlider.
- FIXED: Use get_posts instead of WP_Query to extract slideshows (fix conflicts with plugins using get_post_type in admin_footer hooks).

[2.9.1] - 15 July, 2014

- ADDED: Hungarian Language Pack added.
- ADDED: Admin slide tabs can be modified with filters.
- FIXED: Escape attributes and JS in slideshow output (credit to jwenerd!).
- FIXED: Escape attributes and text fields in admin.

[2.9.0] - 25 June, 2014

- ADDED: Japanese Language Pack added.
- ADDED: Persian Language Pack added.
- ADDED: Switch between tab and list view.
- ADDED: Added ms-left and ms-right css classes to align slideshow to left or right.
- CHANGED: Flex Slider updated to 2.3.0-bleeding (fix initial image fade).
- FIXED: reference to window.parent in media library.
- FIXED: Thumbnail outline in firefox.

[2.8.1] - 28 April, 2014

- FIXED: All in One Events Calendar conflict fix (Advanced Settings not toggling).
- FIXED: CSS resets to avoid theme conflicts.
- FIXED: Autoload visibility conflict (http://wordpress.org/support/topic/autoload-visibillity-conflict).
- FIXED: Layer Editor in IE11 - text fields not accessible in modal windows.
- FIXED: FlexSlider IE11 Fade transition.

[2.8.0] - 28 April, 2014

- ADDED: Russian Language Pack added.
- ADDED: Shortcode parameter added to restrict slideshow to displaying on homepage only (see FAQ).
- CHANGED: Save slideshow after reordering slides.
- FIXED: Carousel image scaling in FireFox.
- FIXED: wpautop issue with double ampersand.
- FIXED: PHP Warning when no slideshows have been created.

[2.8-beta] - 16 April, 2014

- ADDED: Romanian Language Pack added (Thanks to Octav Madalin Stanoaia).
- ADDED: Dutch Language Pack added.
- ADDED: WP Super Cache compatibility - cache is cleared when saving slideshow.
- ADDED: HTML5 Compatibility (Experimental). Set define('METASLIDER_ENABLE_RESOURCE_MANAGER', true); in wp-config.php to move MetaSlider link tags head of the page..
- CHANGED: Preview now uses admin-post action.
- CHANGED: Classes are now auto loaded to reduce memory footprint (Thanks to Viktor Szépe for the above suggestions!).
- CHANGED: Slideshow initialization time reduced.
- CHANGED: HTML5 Compatibility: Alt tags always present on image tag - even if empty..
- CHANGED: Flex Slider slideshows should now 'reserve' a space for themselves while they fully load.
- CHANGED: Flex Slider updated to v2.2.2.

[2.7.2] - 25 March, 2014

- FIXED: Only apply carousel margin to slides.
- FIXED: Enqueue Easing library when carousel mode is enabled, regardless of effect selection.
- FIXED: Thumbnail margin when theme has #content div.

[2.7.1] - 19 March, 2014

- FIXED: Remove easing parameter when effect is set to fade.
- FIXED: Navigation options greyed out in IE.
- FIXED: qTranslate captions not being processed (typo).

[2.7.0] - 18 March, 2014

- ADDED: Croatian Lang pack added.
- ADDED: Carousel margin option added.
- ADDED: Process shortcodes in captions.
- CHANGED: Tab rename UX.
- CHANGED: Admin save spinner functionality improved.
- CHANGED: CSS Resets updated.
- CHANGED: Use plugins_loaded action to initialize plugin.
- CHANGED: "Responsive" option renamed to "R. Slides". The (old) "Responsive" option refers to the "Responsive Slides" jQuery library, but users were getting confused as the naming suggested it was the only responsive option. Flex Slider & Nivo Slider are also responsive..
- FIXED: PHP Warnings when one slideshow exists.

- FIXED: Smart Cropping sometimes not returning smart cropped image.
- FIXED: Add z-index to MetaSlider, attempted conflict fix for themes with drop down menus..
- FIXED: Only include the easing library when transition effect is set to slide.
- FIXED: White Label Branding plugin compatibility..

[2.6.3] - 23 January, 2014

- CHANGED: Various admin screen styling improvements.
- CHANGED: Filters added for complete slideshow output.
- CHANGED: Filter added for slide image label.
- CHANGED: 'No Conflict' mode refactored.
- CHANGED: 'slider' parameter added to flexslider before/start/after etc callbacks.
- CHANGED: Renamed in admin menu from "MetaSlider Lite" to "MetaSlider".
- FIXED: Add 'ms-' prefix to Advanced settings toggle boxes and Preview button (avoid theme conflicts).
- FIXED: RTL fixes.

[2.6.2] - 02 January, 2014

- FIXED: Vantage background image tiling.

[2.6.1] - 31 December, 2013

- ADDED: Norwegian language pack added.
- FIXED: Advanced settings arrow toggle.
- FIXED: All in one SEO / Page builder / MetaSlider conflict.
- FIXED: NextGen "Insert Gallery" conflict.

[2.6.0] - 19 December, 2013

- FIXED: Typo in metaslider_responsive_slide_image_attributes filter.
- FIXED: Caption not working in Nivo Slider.
- FIXED: Tab styling improved.
- FIXED: New window styling improved in WP3.7 and below.

UPGRADE NOTE: More info/Comments: http://www.metaslider.com/coming-soon-meta-slider-2-6-free/.

[2.6-beta] - 15 December, 2013

- ADDED: Interface update for WordPress 3.8 admin redesign.
- ADDED: 'Stretch' setting for full width slideshows.
- ADDED: No conflict mode.
- ADDED: 'Add slider' button for posts and pages.

- ADDED: SEO options (add title & alt text to slides).
- CHANGED: CSS is now enqueued using wp_enqueue_style (Use a minification plugin or caching plugin to move styles to the if HTML5 validity is required - eg W3 Total Cache).

UPGRADE NOTE: More info/Comments: http://www.metaslider.com/coming-soon-meta-slider-2-6-free/.

[2.5.0] - 25 November, 2013

- CHANGED: German Language pack added (thanks to gordon34).
- CHANGED: Chinese language pack updated (thanks to □□□).
- CHANGED: MP6 styling fixes.
- FIXED: JetPack Photon conflict.

[2.5-beta2] - 14 November, 2013

- FIXED: Vantage theme backwards compatibility.
- FIXED: Flexslider anchor attributes filter.

[2.5-beta1] - 12 November, 2013

- FIXED: Center align slideshow.

[2.5-beta] - 12 November, 2013

- ADDED: 'percentwidth' parameter added to shortcode to allow for 100% wide slideshows.
- CHANGED: Generate resized images through multiple Ajax requests on save (blank screen fix).
- CHANGED: IE9 admin styling tidied up.
- CHANGED: Filters added to add/change attributes in and tags.
- CHANGED: Security - nonce checking added.
- CHANGED: Remove bottom margin from flex slider when navigation is hidden (add a CSS Class of 'add-margin' if you need the margin).
- FIXED: Add slides to slideshow in the same order they're selected in the Media Library.
- FIXED: Symlink path resolution.
- FIXED: Do not try to resize/open images that are corrupt (missing metadata) (blank screen fix).

[2.4.2] - 17 October, 2013

- FIXED: qTranslate caption & URL parsing for image slides.

[2.4.1] - 17 October, 2013

- FIXED: PHP Warning (reported by & thanks to: fgirardey).

[2.4.0] - 16 October, 2013

- CHANGED: Settings table tidied up.

- CHANGED: New slides are resized during addition to the slideshow.
- CHANGED: Default slideshow size increased to 700x300.
- CHANGED: Image filename now displayed for each slide (instead of image dimensions).
- CHANGED: Replace deprecated 'live()' jQuery call with 'on()'.
- CHANGED: Polish Language pack added (thanks to gordon34).
- CHANGED: Chinese language pack added (thanks to □□□).
- CHANGED: 'metaslider_resized_image_url' filter added (could be used to disable cropping).
- CHANGED: qTranslate support for slide URLs (see: http://screencast.com/t/FrsrptyhoT).
- CHANGED: PolyLang fix to ensure slides are extracted for all languages (set up a new slideshow for each language).
- CHANGED: WPML fix to ensure slides are extracted for all languages (set up a new slideshow for each language).
- FIXED: FlexSlider styling in twenty twelve theme.
- FIXED: IE10 - "Caption" placeholder text being saved as actual caption.

[2.3.0] - 18 September, 2013

- ADDED: 'metaslider_max_tabs' filter added to convert tab list to ordered drop down menu.
- ADDED: Filters added to allow modification of image slide HTML.
- CHANGED: Flex Slider upgraded to v2.2.
- CHANGED: Responsive Slides upgraded to v1.54.
- CHANGED: 'Create first slideshow' prompt added for new users.
- CHANGED: 'scoped' attribute removed from inline CSS tag until browsers catch up with supporting it properly. A new filter has been added: "metaslider_style_attributes" if you wish to add the scoped attribute back in..
- CHANGED: wp_footer check removed due to confusion.
- CHANGED: Settings area tidied up.
- CHANGED: Image URL Field less restrictive.
- CHANGED: HTML Output tidied up.
- FIXED: Remove 'Insert Media' tab from 'Add Slide' modal (WP 3.6 only).

[2.2.2] - 21 August, 2013

- CHANGED: System check added with option to dismiss messages. Checks made for: role scoper plugin, wp_footer, wordpress version & GD/ImageMagick..

[2.2.1] - 08 August, 2013

- FIXED: Responsive slides styling in FireFox (reported by and thanks to: dznr418).
- FIXED: Flex Slider carousel causing browser to crash in some circumstances.

[2.2.0] - 01 August, 2013

- FIXED: Paragraph tags being added to output using Nivo Slider.

[2.1.6] - 22 July, 2013

- CHANGED: Refresh slides after clicking 'save'.
- CHANGED: Added hook to adjust carousel image margin.
- CHANGED: Ensure taxonomy category exists before tagging slide to slideshow.
- FIXED: Use the original image file if the slideshow size is the same size as the image file.
- FIXED: Conflict with Advanced Post Types Order plugin.
- FIXED: Colorbox conflict when using resizable elements in lightbox.
- FIXED: Only submit form when submit button is clicked (not all buttons).
- FIXED: Coin slider caption width in FireFox.

[2.1.5] - 24 May, 2013

- FIXED: HTML 5 Validation.

[2.1.4] - 21 May, 2013

- FIXED: Widget markup invalid (reported by and thanks to: CarlosCanvas).

[2.1.3] - 21 May, 2013

- FIXED: User Access Manager Plugin incompatibility issues (reported by and thanks to: eltipografico).

[2.1.2] - 21 May, 2013

- ADDED: Spanish language pack (thanks to eltipografico).
- CHANGED: Title field added to widget (suggested by and thanks to: pa_esp).
- FIXED: Nivo Slider theme select dropdown (reported by and thanks to: macks).
- FIXED: HTML5 Validation fix for inline styles.

- FIXED: hitting [enter] brings up Media Library.

[1.0.1] - 17 February, 2013

- FIXED: min version incorrect (should be 3.5).

[1.0.0] - 15 February, 2013

- ADDED: First set of features.

UPGRADE NOTE: First release.

MetaSlider Slideshow Pro Changelog

The Pro version of the MetaSlider Slideshow plugin is available for subscribers here on MetaSlider.com. The changelog for the Pro plugin is below:

The format is based on Keep a Changelog

and this project adheres to Semantic Versioning.

[2.62.0] - 27 October, 2026

- FIXED: Slideshows could fail to start, with the error "flexslider is not a function", when the site's theme loaded its own copy of jQuery, #1520;
- FIXED: PHP warnings on Responsive Slides, Nivo Slider and Coin Slider slideshows using a custom theme made from a base theme. These themes now only apply to FlexSlider slideshows, #1522;
- FIXED: After an update, browsers could keep using old copies of the Pro themes' style and script files, #1538;
- FIXED: On a page with both a Tandem and an Undertone slideshow, the Undertone theme's script didn't load, #1536;
- FIXED: Updating the thumbnail of YouTube, Vimeo and TikTok slides now checks that the user can edit slideshows, and Vimeo thumbnails load over HTTPS, #1518;
- FIXED: Updating a YouTube, Vimeo or TikTok slide's thumbnail could change another post's featured image, #1553;
- FIXED: YouTube, Vimeo and TikTok video IDs are now checked before they are used, #1554;
- FIXED: Downloading YouTube, Vimeo and TikTok thumbnails could reach internal addresses on the server's network, #1555;
- FIXED: TikTok slides got no thumbnail image, because TikTok stopped sending one through its oEmbed service, #1560;

- FIXED: A TikTok slide could show one video's thumbnail but play a different video, or lose its thumbnail, #1559;
- FIXED: TikTok slides with Lazy Load: the thumbnail stayed next to the video after clicking play, the player could appear cropped and off-center, and each extra click loaded the video again, #1561;
- FIXED: Adding a slide could create it in a post that isn't a slideshow, #1557;
- FIXED: Duplicating a slide, or changing its video sources, cover or custom thumbnail, could copy or change another post, #1567, #1558;
- FIXED: After deleting a custom theme, the Theme Editor showed a warning about legacy slider libraries instead of a confirmation, #1570;
- CHANGED: Stricter checks when deleting custom themes and saving slideshow CSS, #1569;
- CHANGED: Stricter escaping in the Post Feed, WooCommerce and Layer slide settings, and some code cleanup, #1573;
- CHANGED: The slideshow editor opens faster for slideshows with many slides, and now requires MetaSlider Slideshow 3.114.0 or newer, #1526;
- CHANGED: Smaller, minified script and style files are now loaded by default, so pages load a little faster, #1525;
- CHANGED: Update simba-plugin-manager-updater to 1.9.8, plugin-update-checker to 5.7, and the development dependencies, #1516;
- CHANGED: Update Axios to 1.20 and other project dependencies, #1517;
- ADDED: Custom thumbnail setting for Livid video slides, #1530;

[2.61.0] - 17 September, 2026

- ADDED: Add Layer slides from the Unsplash and Pixabay tabs, the same as image slides, #1449;
- CHANGED: Local Video slides, and the Pixabay video search that goes with them, now come from MetaSlider Slideshow, which this version requires at 3.113.0 or newer;
- FIXED: Pro would not load against a beta or release candidate build of the MetaSlider Slideshow version it requires;
- FIXED: The slideshow preview was broken when a slide used Show only in the first loop, #1510;
- FIXED: A flaky CI test setup step that could run before the test site had finished installing, #1492;
- FIXED: Layer slide "Edit Source" could show already-escaped HTML as text, #1491;
- FIXED: Creating the first custom theme in the Theme editor could log a PHP notice, #1476;
- FIXED: YouTube slides showing PHP warnings when a video can't be embedded on other websites, #1451;
- CHANGED: Translation updates, #1508, #1514;

[2.60.0] - 31 August, 2026

- ADDED: Reset theme customize settings back to their defaults, #920;
- ADDED: Preview Layer slide animations without leaving the editor, #1295;
- ADDED: Add Pixabay videos to Local Video slides, #1440, #1462;
- ADDED: Added a Background Color demo to Quickstart, #1446;
- ADDED: Add a watermark image over your slideshow, #387;
- FIXED: A scheduled slide could show an incorrect date warning, #862;
- FIXED: Color picker issues in Layer slides, #1430;
- FIXED: Pro features loading on unrelated admin pages, #1434;
- FIXED: Developers can now customize the default Layer slide scaling behavior, #1435;
- FIXED: Background style issue in the Theme editor, #1437;
- FIXED: Added a warning when Folder slide dates aren't valid, #1438;
- FIXED: Background Color: duplicating a slide wasn't working, #1442;
- FIXED: Background Color: "Add to slideshow" button not staying active, #1443;
- FIXED: Background Color: caption editor went empty after reordering, #1444;
- FIXED: Background Color: missing thumbnails when exporting/importing, #1445;
- FIXED: A transition setting could be overridden by other themes on the same page, #1448;
- FIXED: Oversized play icon on YouTube, Vimeo and TikTok slides, #1452;
- FIXED: Broken plugin icon on the Plugins page, #1453;
- FIXED: PHPCS errors, #1457;
- FIXED: Excluded unnecessary translation files from the plugin zip package, #1460;
- CHANGED: Updated Spanish, French and Italian translations, #1374;
- CHANGED: Updated the Axios npm package and other project dependencies, #1426;
- CHANGED: Updated translations for all supported languages, #1458;

[2.59.0] - 29 July, 2026

- ADDED: New Background Color slide type, #1388, #1414, #1406, #1423;
- ADDED: Allow to insert images through TinyMCE, #1415;
- ADDED: Add icons into captions, #1417;
- ADDED: Accessibility settings for Theme editor, #1005;
- ADDED: Accessibility improvements: focus outline for navigation arrows, #1409;
- ADDED: Show a slide just once on the first loop, #1355;
- ADDED: Image folder: allow WP date format, #1401;
- ADDED: Schedule: allow WP date format, #1385;
- FIXED: Duplicated slides doesn't trigger the date picker on click, #1398;
- FIXED: Layer slides: end animation delay not working, #1396;
- FIXED: Folder Images and Post Images: Smart pad images generates a fatal error, #1422;

[2.58.0] - 15 June, 2026

- ADDED: Tooltip information when using em or rem units in Theme editor, #1188;
- ADDED: Allow to duplicate layer slides, #1345;
- ADDED: Translate MetaSlider Pro into more languages, #1357, #1370, #1378;
- FIXED: Sanitize layer slides HTML with HTML Purifier, #1350;
- FIXED: Screen id changed after renaming admin menu, #1367;
- FIXED: Sanitize and escape slide URLs, #1346;
- FIXED: Add capability check when creating slides, #1347;
- FIXED: Escape URL in inline JS for theme editor, #1348;
- FIXED: Cast to integer filmstrip settings, #1351;
- FIXED: Add nonce check for save css, #1352;
- FIXED: Escape and restrict layer slides link befor window.open, #1354;
- FIXED: Padding issue in green notice message, #1362;
- FIXED: Layer slides: sometimes instructions on load disappears, #1366;
- FIXED: Scrollbars for Layer Slides drag and drop, #1373;
- FIXED: Schedule: make date field larger, #1384;
- CHANGED: Update Axios to 1.17, #1339;
- CHANGED: Reorganize position for save button for Layer Slides, #1340;
- CHANGED: Text for hide by device in Layer slides, #1322;
- CHANGED: Translation Updates for ES, IT and FR, #1342;
- CHANGED: Remove "MetaSlider" word from menu, #1360;
