Introduction to Image Folder Slides (Pro)

Slideshow: Image Folder Slides · https://www.metaslider.com/docs/image-folder-slides/

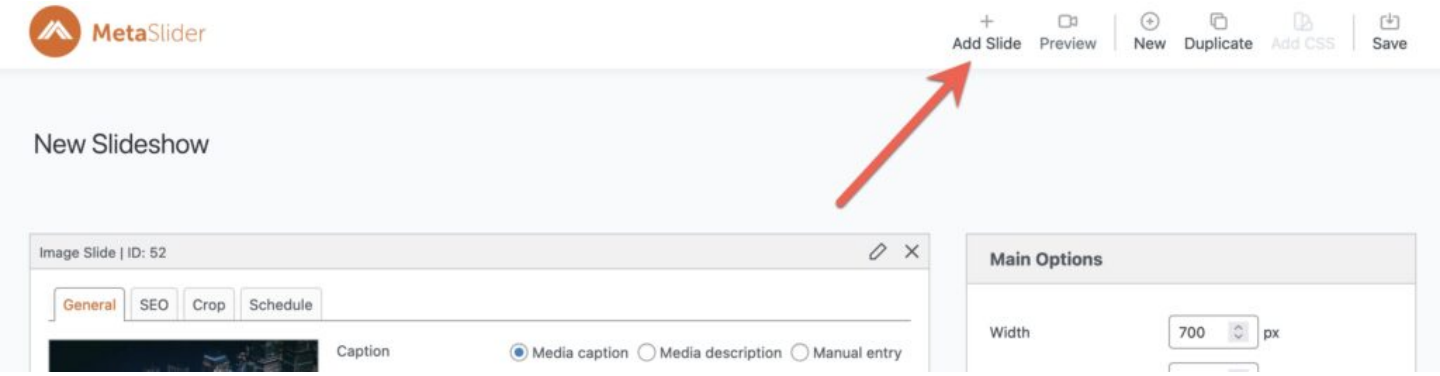

This feature requires the MetaSlider Slideshow Pro plugin.

Image Folder Slides are included in MetaSlider Pro.

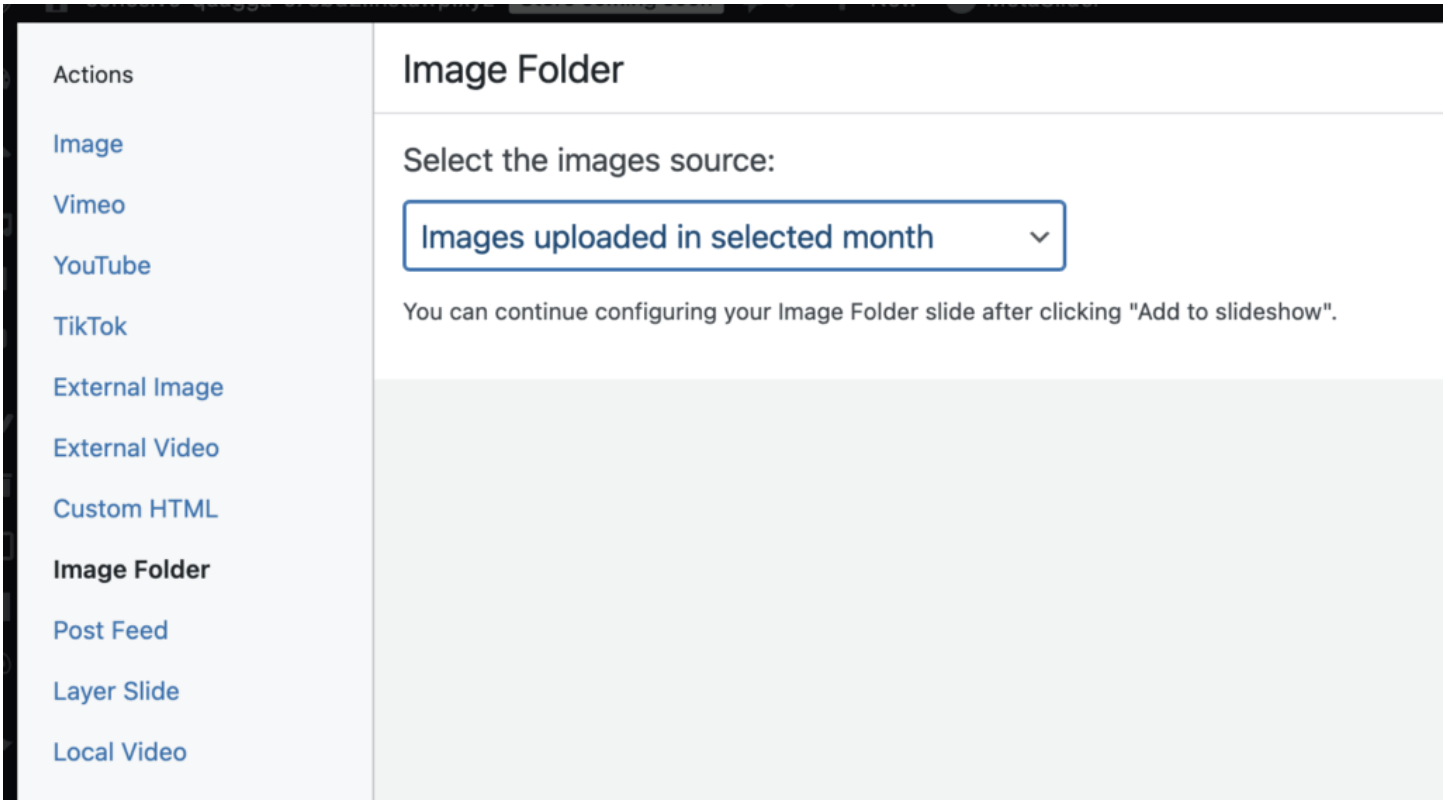

This slide type allows to select a folder from your Media Library and create a slideshow from that folder. You can choose all the images uploaded to a specific folder in /wp-content/uploads/ or all the images uploaded between specific dates.

Add a new Image Folder Slide to your slideshow

- Click the “Add Slide” button to launch the Media Manager.

- Select “Image Folder” from the left.
- Choose the image source. You can choose either "Images uploaded in selected month" or "Images uploaded between selected dates".

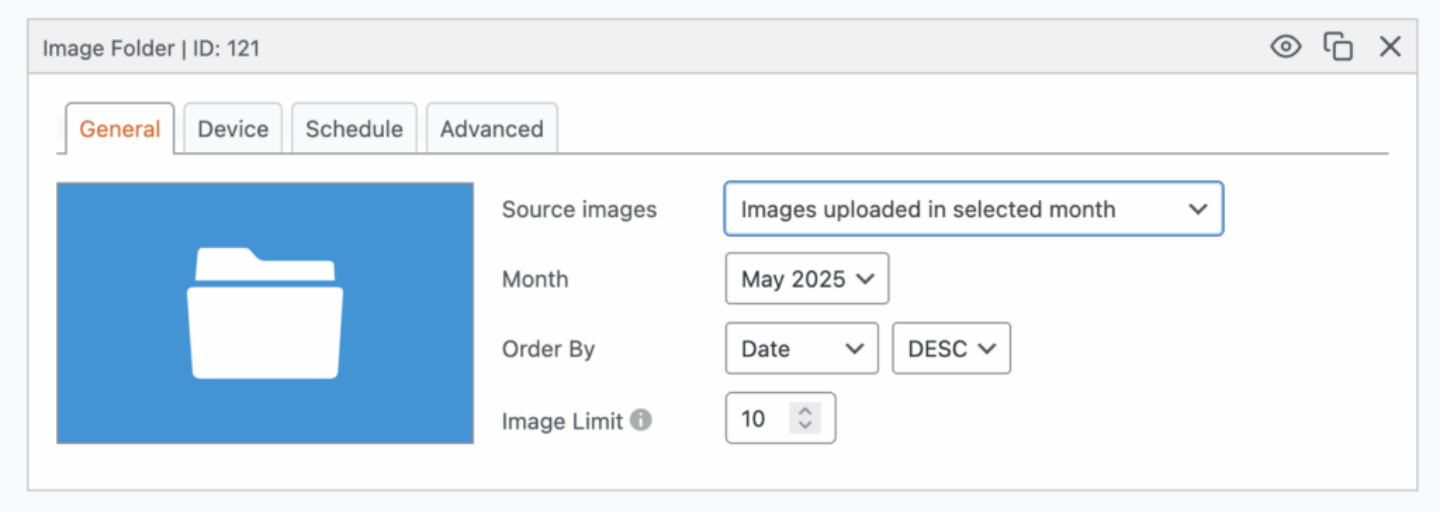

- Click the “Add to slideshow” button.
- The Media Manager will close and your Image Folder slide will be added to your slideshow.

Configure your Image Folder slide

The “General” tab allows you to configure the parameters used for the image folder.

If you choose "Images uploaded in selected month" these will be the options available:

- **Month**: Choose the month you want to select for upload images.
- **Order By**: This control how the images are ordered in the slideshow.
- **Image Limit**: This will control how many images are displayed in the slideshow.

If you choose "Images uploaded in selected dates" these will be the options available:

- **From and To**: Choose the dates you want to select for upload images.
- **Order By**: This control how the images are ordered in the slideshow.
- **Image Limit**: This will control how many images are displayed in the slideshow.
