Introduction to TikTok Slides (Pro)

Slideshow: Slide Types · https://www.metaslider.com/docs/introduction-to-tiktok-slides/

This feature requires the MetaSlider Slideshow Pro plugin.

TikTok Slides are included in MetaSlider Pro.

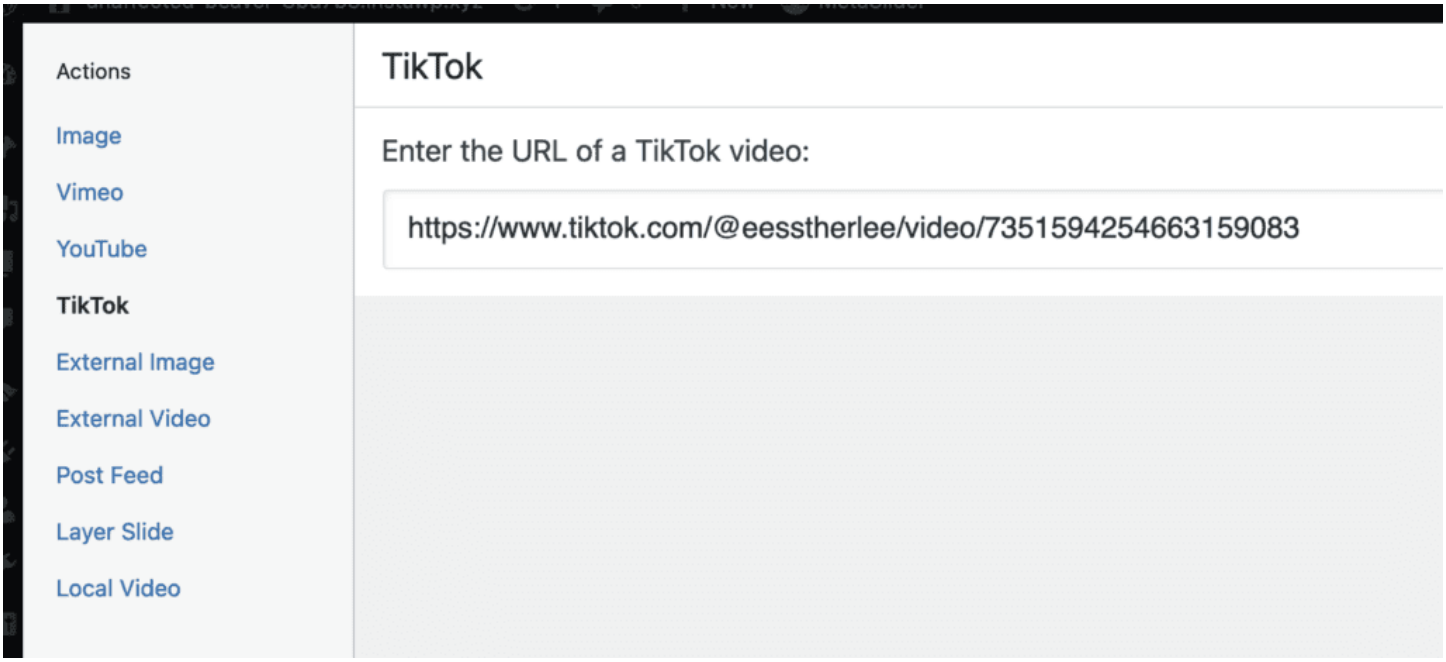

A TikTok Slide will display a video in your slideshow directly from TikTok.com.

Add a new TikTok Slide to your slideshow

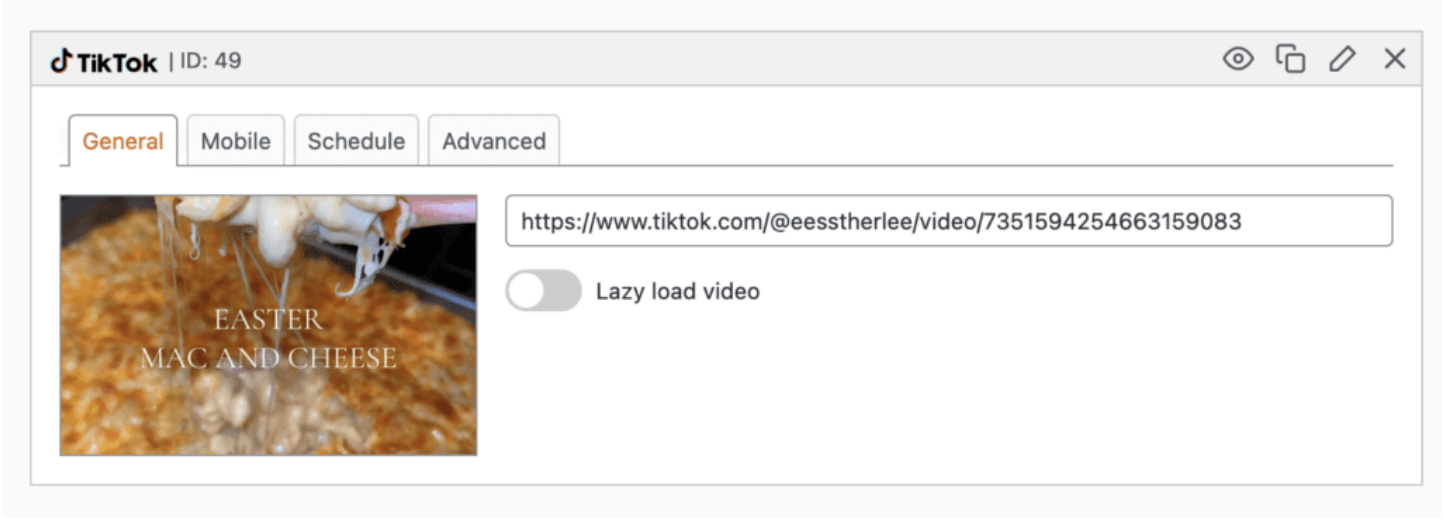

- Click the “Add Slide” button to launch the Media Manager.

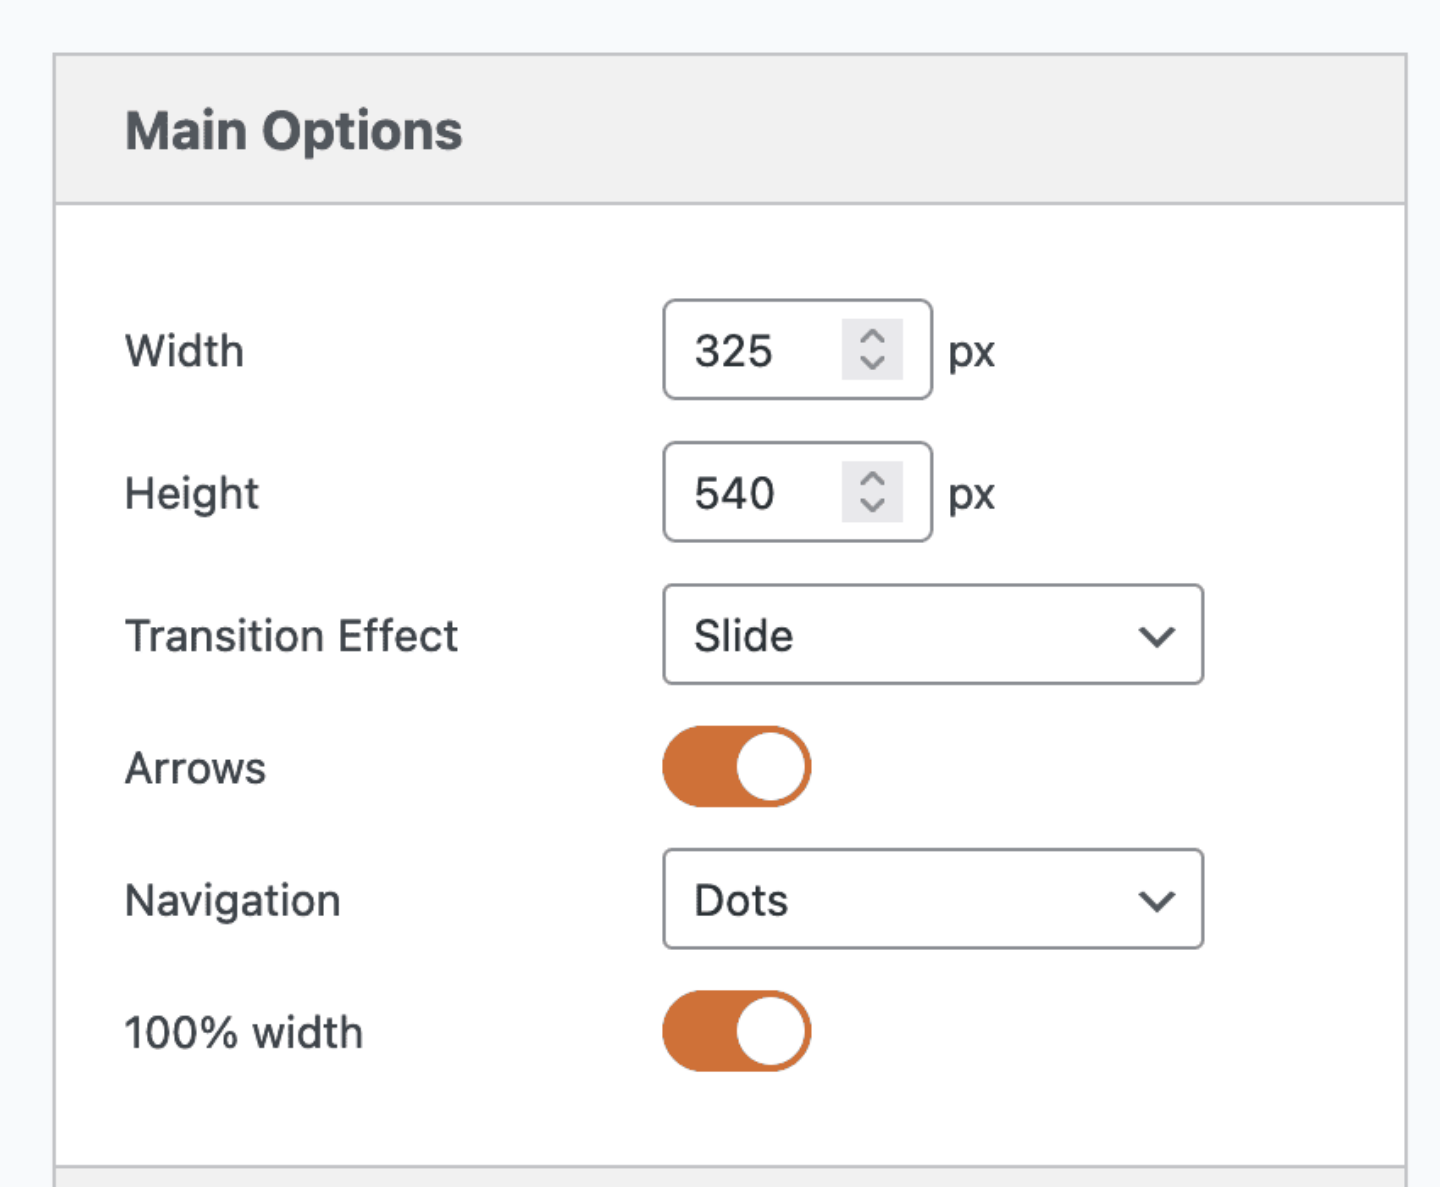

- Select “TikTok” from the left.
- Paste any TikTok URL into the text input.
- Click the "Add to slideshow" button.

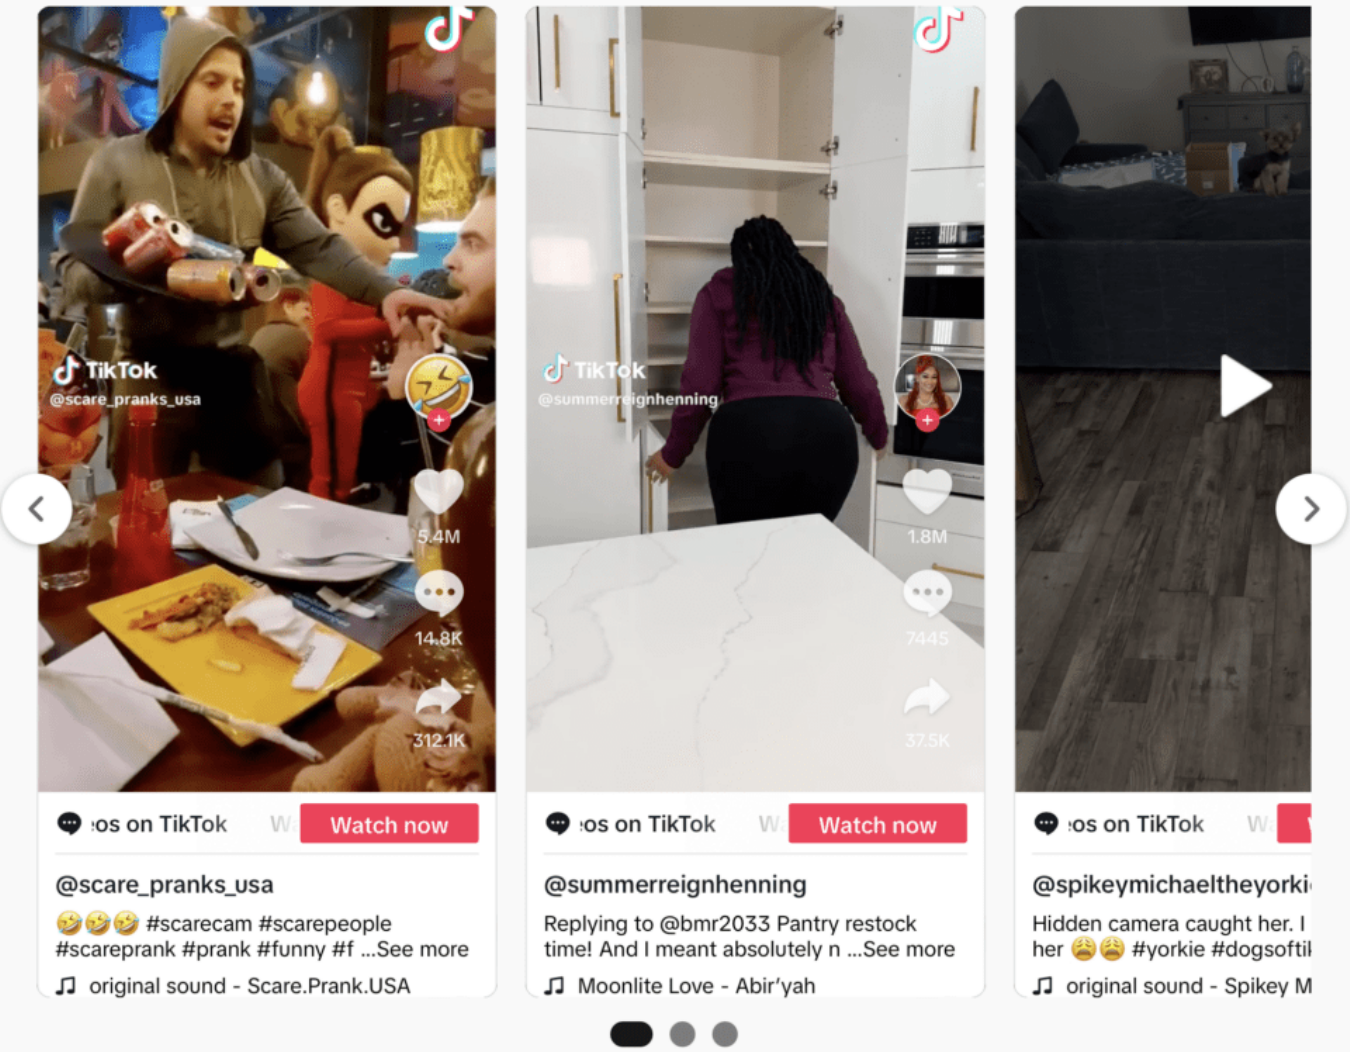

- You will now see a new slider with a preview of your TikTok video. If you don't see a preview, you may need to turn off any features in your browser that block ads or social networks.

- Choose a good height and width for your videos. TikTok videos use a 16:9 aspect ratio. Click here for more details on recommended sizes. So in the right sidebar, choose an appropriate height and width. 325px wide and 540px high is a common choice.

TikTok slides will work with any theme, but we do provide a theme called "Social Play" that is specifically optimized for vertical, social videos.
