Getting Started With MetaSlider Pro Versions

Get Started With MetaSlider · https://www.metaslider.com/docs/metaslider-pro/

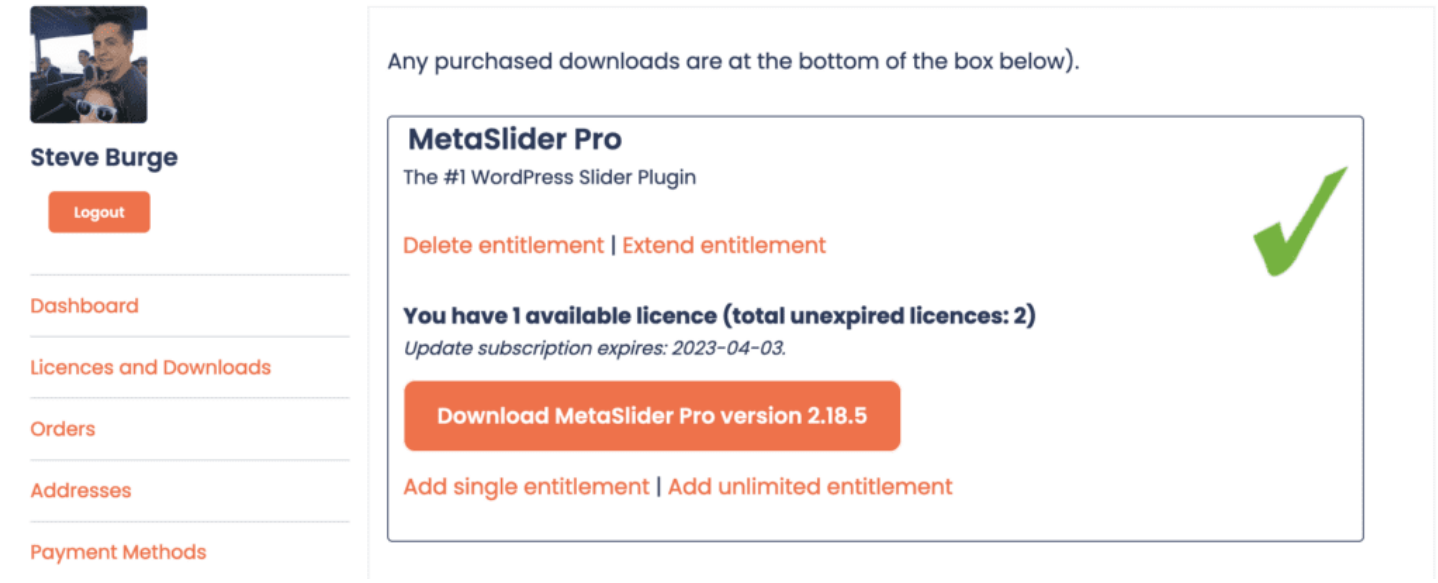

In this guide, we'll show you how to install and use the Pro version of a MetaSlider plugin.

Before you install the Pro version, please follow this guide to make sure you have the Free version of your plugin installed. You should see a MetaSlider link in your WordPress admin menu, as in the image below.

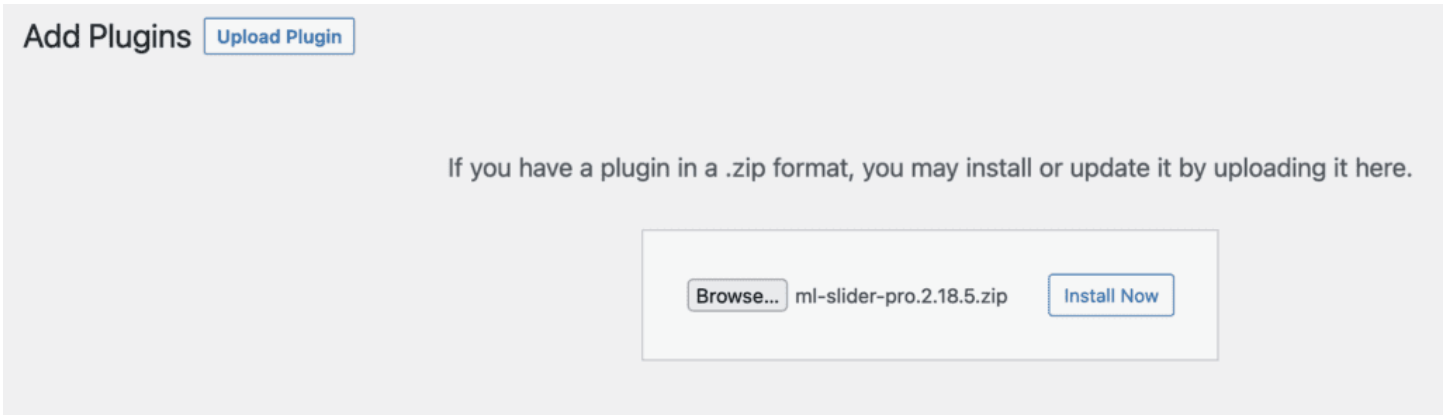

You are now ready to install the Pro version of your plugin.

- Log in here to MetaSlider.com.
- Click "Licenses and Downloads" in the sidebar.
- Click the big orange download button.

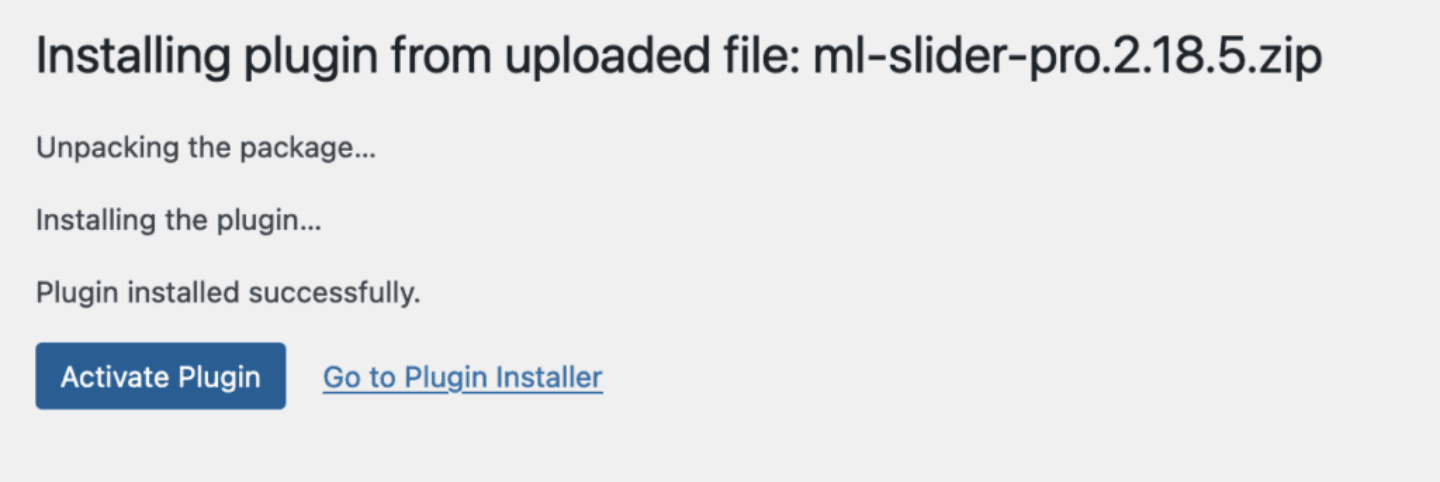

Now it's time to go to your WordPress site and install the plugin.

- Go to the "Plugins" link in your WordPress site.
- Click "Add New".
- Click "Upload".
- Click "Browse" and select the file from your desktop.
- Click "Install Now".

- Click "Activate Plugin".

- You will see both the Free and the Pro version installed on your site.
- Finally enter your customer login information on this screen. Enter the email and password that you use for MetaSlider.com.
- Congratulations: your Pro version is ready to use.
