Numbers Navigation in MetaSlider

Slideshow: Slide Navigation · https://www.metaslider.com/docs/numbers-navigation/

MetaSlider offers several different ways for visitors to navigate to different slides. One of those options is to show numbers. This is a version of the "Dots" navigation and works in the same way.

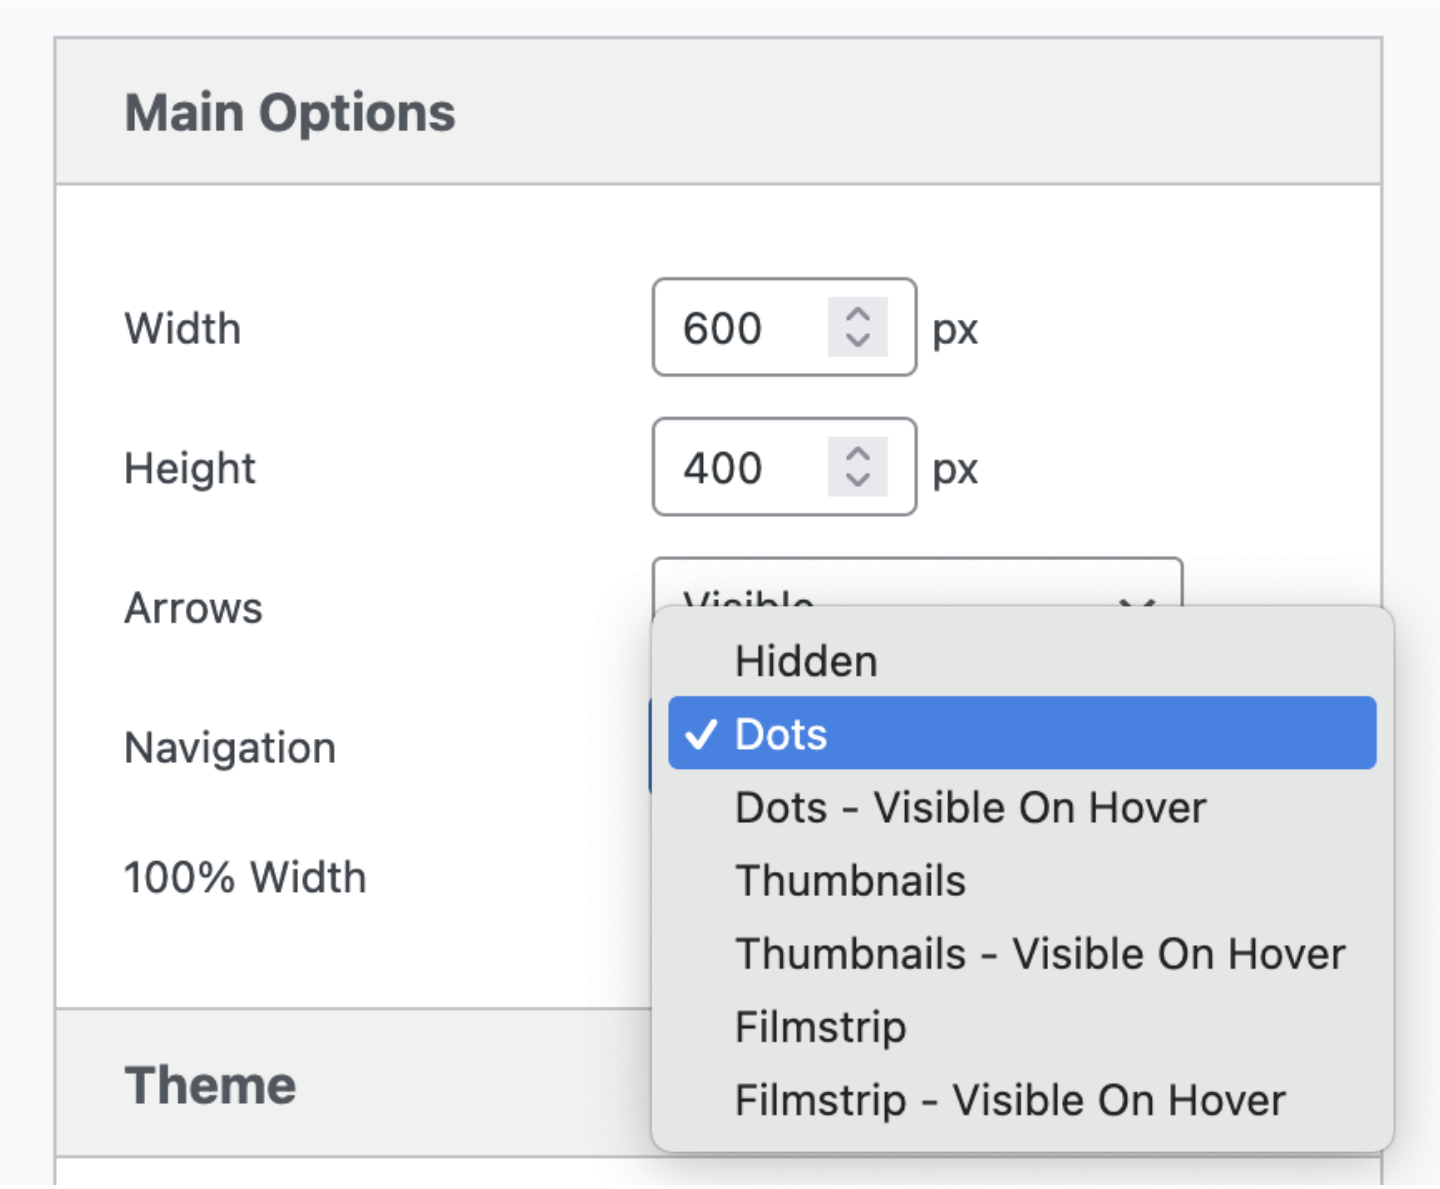

These numbers have two purposes:

- The numbers can show how many slides are in the slideshow.
- The numbers can be clickable and serve as a navigation tool.

How to use Numbers Navigation

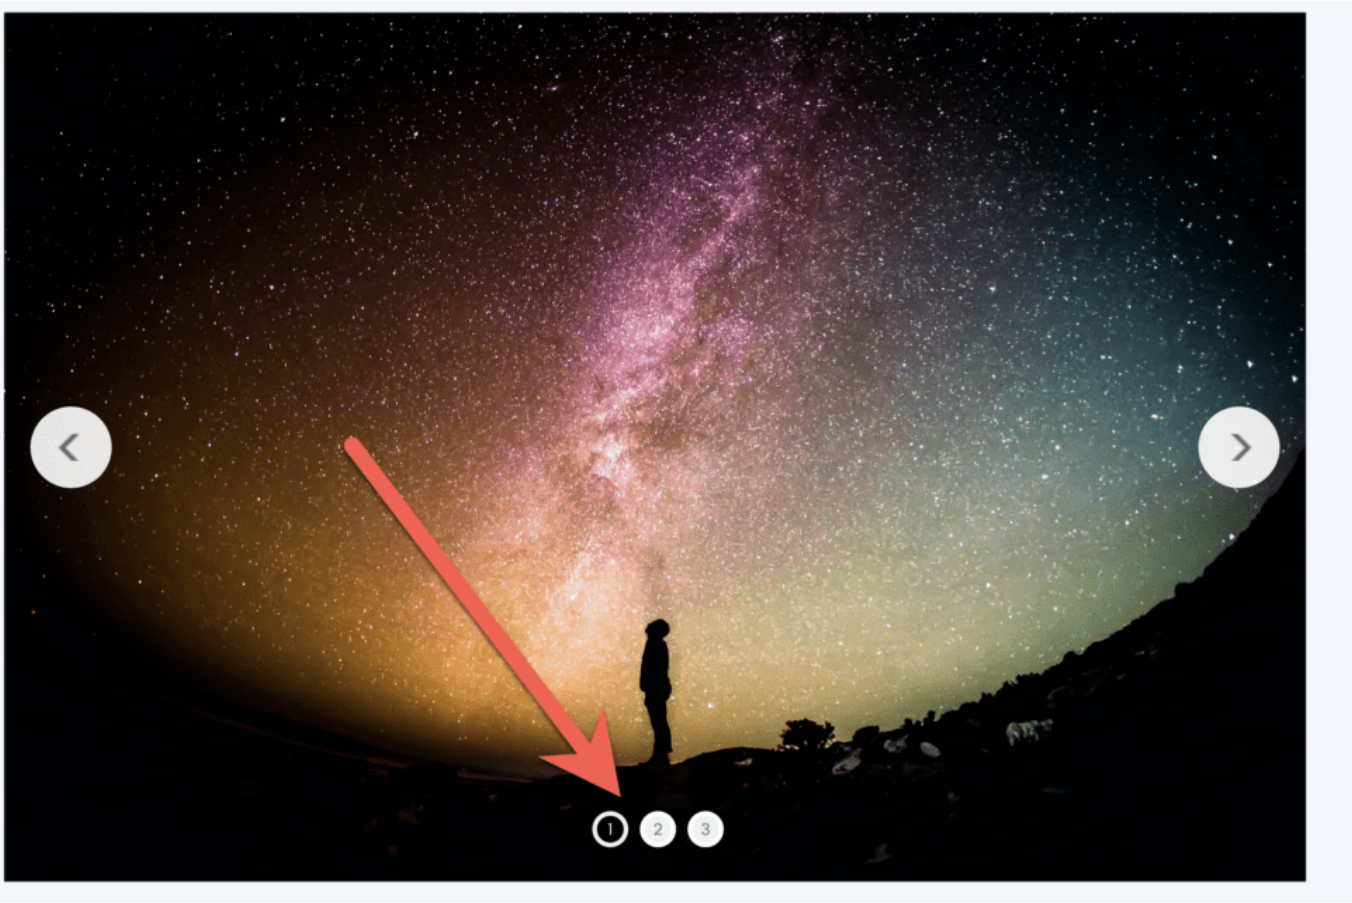

The numbers navigation in MetaSlider is controlled by the theme. Several themes have a numbers options: Blend, Bubble, Radix, and The Architekt. Click here for details on all the themes in MetaSlider .

To enable the Numbers navigation, choose one of the themes with the numbers style. Also, you need to enable the "Dots" navigation option.

Examples of Numbers Navigation

In this screenshot below, you can see numbers inside small circles. If you click any of these numbers, you will be taken to the appropriate slide. Click here to see this slideshow and the instructions on how to create it. This design uses the "Bubble" theme.

In this screenshot below, you can see the numbers in the top-right corner. These numbers are not clickable, but they are stylish and helpful for visitors. Click here to see this slideshow and the instructions on how to create it. This design uses the "Radix" theme.

In this screenshot below, you can see the numbers below the slideshow. This design uses the "My Architekt" theme.
