The Launch Layer Editor Button Is Missing

Slideshow Troubleshooting · https://www.metaslider.com/docs/the-launch-layer-editor-button-is-missing/

This guide will help if you're using the Layer Slides feature but can't see the "Launch Layer Editor" button. Normally this happens if you’re viewing previously created Image slides. The button will only appear for Layer Slides.

Here's how to create a new Layer Slide.

1. Click "Add Slide".
2. Click ‘Layer Slide’ at the bottom of the list.
3. Then select an image – it’s important an image is selected after you click on ‘Layer’
4. Click "Add to slideshow".

This guide has full details on using Layer Slides.
