WP Fastest Cache and MetaSlider

Slideshow: Cache and Optimization · https://www.metaslider.com/docs/wp-fastest-cache/

WP Fastest Cache is a popular WordPress cache plugin developed to speed up WordPress sites. This guide has tips for troubleshooting issues if you are using MetaSlider with the WP Fastest Cache plugin.

If you are using the WP Fastest Cache plugin on your site and the slideshow is not updating, check the “Exclude" settings. Under the “Exclude Pages” tab, click the "Add New Rule" button to exclude any pages with MetaSlider slideshows.

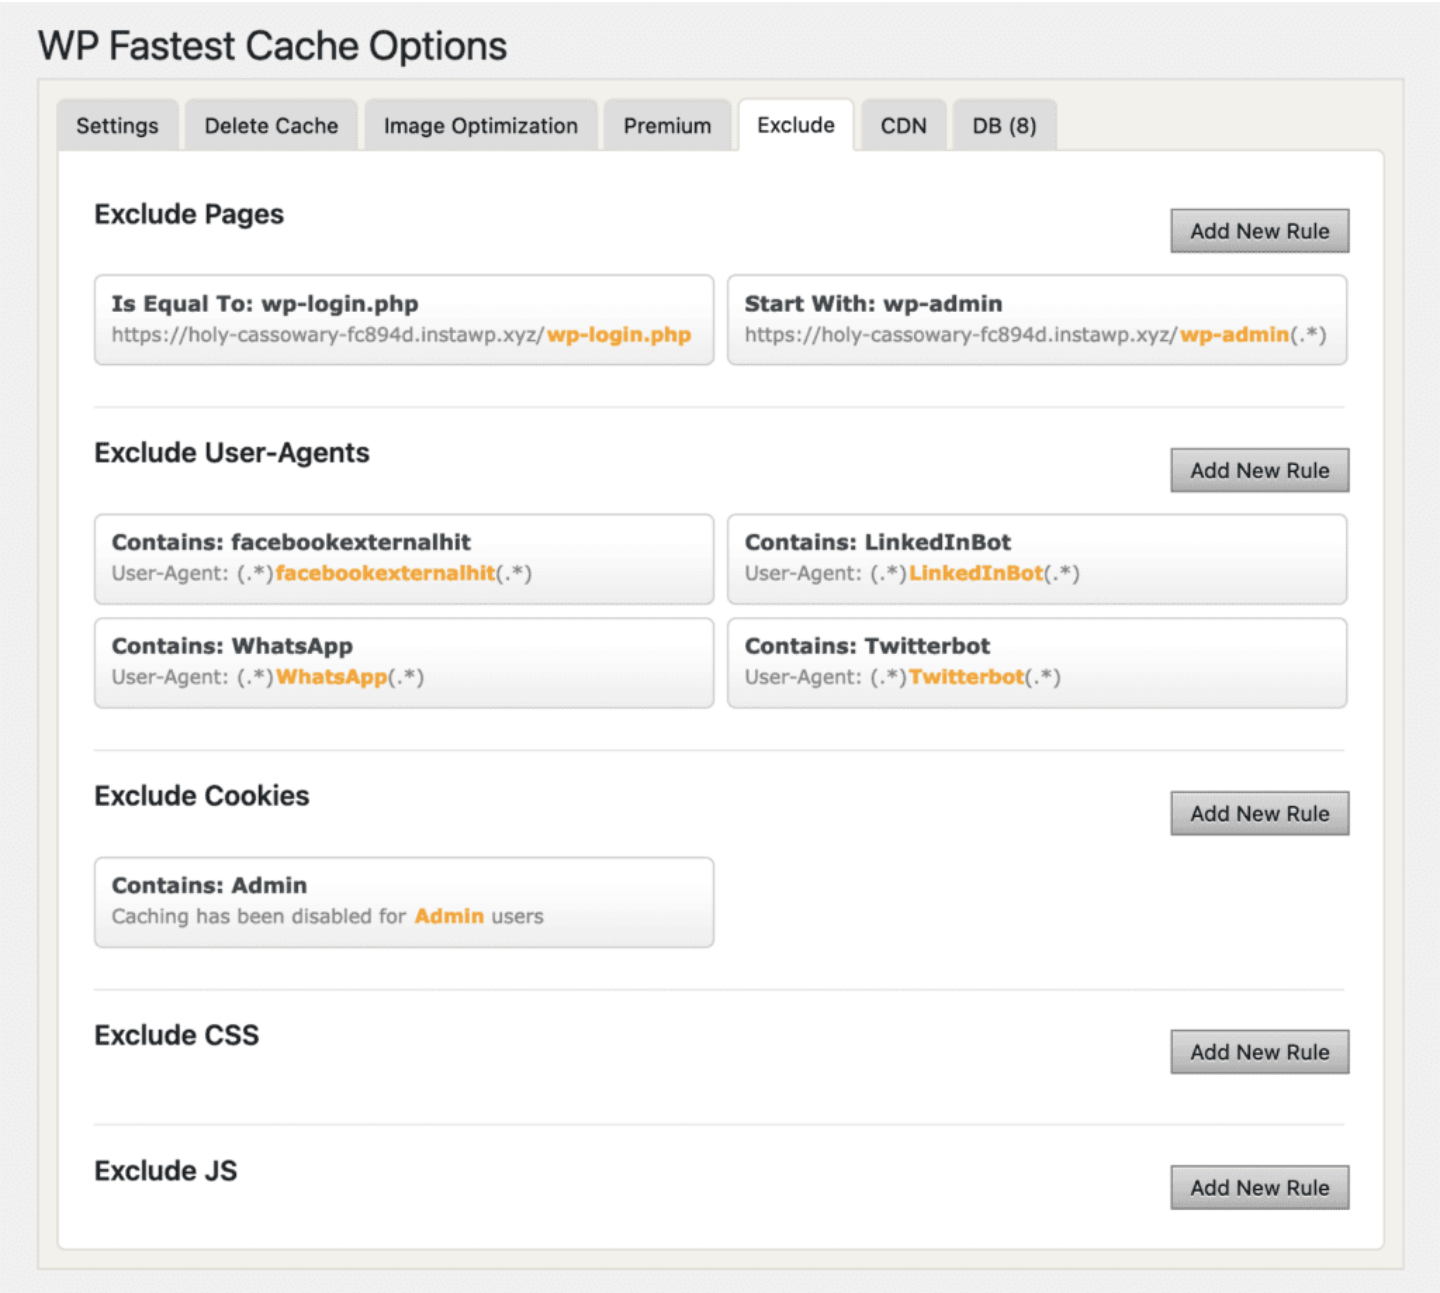

If you are using the WP Fastest Cache plugin on your site and the slideshow is not loading, check the “Exclude” settings. Click "Add New Rule" under the “Exclude CSS” heading, and try excluding these CSS files:

`/wp-content/plugins/ml-slider/assets/sliders/flexslider/flexslider.css`
`/wp-content/plugins/ml-slider/assets/metaslider/public.css`

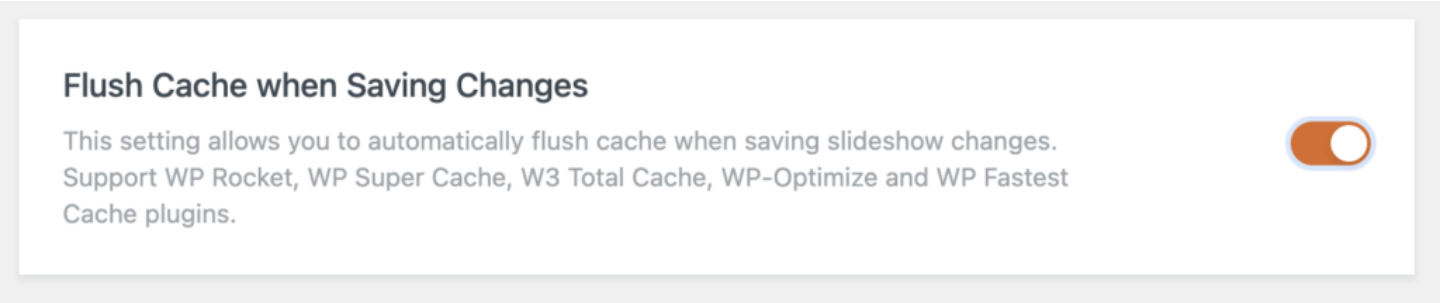

And also try excluding these Javascript files, by clicking "Add New Rule" under the "Exclude JS" heading.

`/wp-content/plugins/ml-slider/assets/metaslider/script.min.js`
`/wp-content/plugins/ml-slider/assets/easing/jQuery.easing.min.js`
`/wp-content/plugins/ml-slider/assets/sliders/flexslider/jquery.flexslider.min.js`

This feature requires the MetaSlider Slideshow Pro plugin.

MetaSlider Pro offers an option to automatically flush the cache when saving slideshow changes. This feature supports WP Fastest Cache. You can enable this feature by going to the "Settings & Help" area and enabling the "Flush Cache when Saving Changes" feature.

Flush Cache when Saving Changes
This setting allows you to automatically flush cache when saving slideshow changes. Support WP Rocket, WP Super Cache, W3 Total Cache, WP-Optimize and WP Fastest Cache plugins.
