Image sizes

The sizes listed below determine the maximum dimensions in pixels to use when adding an image to the Media Library.

Thumbnail size	Width	150
	Height	150
	<input checked="" type="checkbox"/> Crop thumbnail to exact dimensions (normally thumbnails are proportional)	
Medium size	Max Width	300
	Max Height	300
Large size	Max Width	1024
	Max Height	1024

Uploading Files

Organise my uploads into month- and year-based folders

FancyBox

The options in this section are provided by the plugin [Easy FancyBox](#) and determine the **Media Lightbox** overlay appearance and behavior controlled by [FancyBox](#).

Donate

First enable each sub-section that you need. Then save and come back to adjust its specific settings. Note: Each additional sub-section and features like **! ÁÄ çKÁÁ Ö, c k YÄ Á ÖYÄ ÖY** and all c l YÖ ÇBÜ Á (except Swing) will have some extra impact on client-side page speed. Enable only those sub-sections and options that you actually need on your site. Some setting like Transition options are unavailable for SWF video, PDF and iFrame content to ensure browser compatibility and readability.

Miscellaneous

Include the Mousewheel jQuery extension script to allow gallery browsing by mousewheel action.

Auto popup

Open on page load

[/ r v G r v A i Ö Y P](#)

Delay in milliseconds Z GB A i A i a a

Hide popup after first visit? / I I G

[I Y a u G P](#)

Browser & device compatibility

Minimum browser/device viewport width

(leave empty to ignore)

Include IE 8 compatibility style rules

Theme & plugins compatibility

Try to deactivate all conflicting light box scripts in your theme or other plugins. If this is not possible, try a higher script priority number which means scripts are added later, wich may allow them to override conflicting scripts. A lower priority number, excluding WordPress standard jQuery, or even moving the plugin scripts to the header may work in cases where there are blocking errors occuring in other script.

Fancybox script priority Default priority is

10. Higher is later.

Move scripts from footer to theme head section (not recommended for site load times!)

Do not include standard WordPress jQuery library (do this only if you are sure jQuery is included from another source!)

Do not use wp_add_inline_script/style functions (may solve issues with older script minification plugins)

Advanced

Include the Metadata jQuery extension script to allow passing custom parameters via link class.. [/ I I G I Y a u G P](#)

WPBakery / Visual Composer - Masonry Grid Gallery compatibility. [/ I I G I Y a u G P](#)

Images

To make images open in an overlay, add their extension to the Autodetect field or use the class "fancybox" for its link. Clear field to switch off all autodetection.

Autodetect

Inline content

Apply to [/ i v G i v A i Ö Y P](#)

Force FancyBox to treat all media linked with class="fancybox" as images?

Behavior

Transition In Easing In

[/ i v G i v A i Ö Y P](#)

Transition Out Easing Out

[/ i v G i v A i Ö Y P](#)

Note: Easing effects only apply when Transition is set to Elastic.

- Transparency fade during elastic transition. CAUTION: Use only when at least Transition In is set to Elastic!
- Close FancyBox when content is clicked

Appearance

Show title. FancyBox will try to get a title from the link or thumbnail title attributes.

Title Position

Allow title from thumbnail alt attribute.

Advanced

[/ i v G i v A i Ö Y P](#)

Gallery

Autogallery [/ i v G](#)

[i v A i Ö Y P](#)

Note: When disabled, you can use the rel attribute to manually group image links together.

- Show the gallery navigation arrows
- Arrow key strokes browse the gallery
- Make galleries cyclic, allowing you to keep pressing next/back.

Change speed Fade speed

Duration in milliseconds. Higher is slower. [ZGB AaQ](#)
[AaQ](#)

Advanced [/ i v G i v A i Ö Y P](#)

To make inline content open in an overlay, wrap that content in a div with a unique ID, create a link with target "#uniqueID" and give it a class "fancybox-inline" attribute.

- Try to adjust size to inline/html content. If unchecked the default dimensions will be used.
